

# Osmosis & Diffusion Worksheet:

- Y or N:** Is water always able to diffuse through a cell's selective permeable membrane?
- Y or N:** Are solutes always able to diffuse through a cell's selective permeable membrane?
- The movement of molecules across a cell membrane against its concentration gradient is called \_\_\_\_\_.

Below are animal cells placed in beakers of various concentrations

For each beaker:

- Draw an arrow to show which way the water would move by osmosis.
- Draw and label what would happen to the cell as a result of diffusion/osmosis (shrink, swell).
- Name the type of solution (hypertonic, isotonic, hypotonic).
- If there are any missing percentages, fill them in.

For cells 10-18, the particle size of the solute is not able to diffuse through the semi-permeable membrane.
