Proakis,Dimitris G. Manolakis,2007 A significant revision of a best selling text for the introductory digital signal processing course This book presents the fundamentals of discrete time signals systems and modern digital processing and applications for students in electrical engineering computer engineering and computer science The book is suitable for either a one semester or a two semester undergraduate level course in discrete systems and digital signal processing It is also intended for use in a one semester first year graduate level course in digital signal processing Encyclopedia of Information Science and Technology, Second Edition Khosrow-Pour, D.B.A., Mehdi,2008-10-31 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher **Analysis of Computer and Communication Networks** Fayez Gebali,2008-06-24 The purpose of this book is to give the reader two things to paraphrase Mark Twain Roots to know the basics of modeling networks and Wings to fly away and attempt modeling other proposed systems of interest The Internet phenomenon is affecting us all in the way we communicate conduct business and access information and entertainment More unforeseen applications are still to come All of this is due to the existence of an efficient global hi performance network that connects millions of users and moves information at a high rate with small delay High Performance Networks A high performance network is characterized by two performance measures ba width and delay Traditional network design focused mainly on bandwidth planning the solution to network problems was to add more bandwidth Nowadays we have to consider message delay particularly for delay sensitive applications such as voice and real time video Both bandwidth and delay contribute to the performance of the network Bandwidth can be easily increased by compressing the data by using links with higher speed or by transmitting several bits in parallel using sophisticated modulation techniques Delay however is not so easily improved It can only be reduced by the use of good scheduling protocols very fast hardware and switching equipment throughout the network The increasing use of optical fibers means that the transmission channel is close to ideal with extremely high bandwidth and low delay speedoflight Theareasthatneedoptimizationaretheinterfacesanddevices that connect the different links together such as hubs switches routers and bridges Computational Intelligence in Biomedical Engineering Rezaul Begg,Daniel T.H. Lai,Marimuthu Palaniswami,2007-12-04 As in many other fields biomedical engineers benefit from the use of computational intelligence CI
