**Globalization's Contradictions** Dennis Conway, Nik Heynen, 2006-11-22 Since the 1980s globalization and neoliberalism have brought about a comprehensive restructuring of everyone's lives People are being disciplined by neoliberal economic agendas transformed by communication and information technology changes global commodity chains and networks and in the Global South in particular destroyed livelihoods debilitating impoverishment disease pandemics among other disastrous disruptions are also globalization's legacy This collection of geographical treatments of such a complex set of processes unearths the contradictions in the impacts of globalization on people's lives Globalization's Contradictions firstly introduces globalization in all its intricacy and contrariness followed on by substantive coverage of globalization's dimensions Other areas that are covered in depth are globalization's macro economic faces globalization's unruly spaces globalization's geo political faces ecological globalization globalization's cultural challenges globalization from below fair globalization Globalization's Contradictions is a critical examination of the continuing role of international and supra national institutions and their involvement in the political economic management

and determination of global restructuring Deliberately this collection raises questions even as it offers geographical insights and thoughtful assessments of globalization s multifaceted faces and spaces *Global Bioethics* Henk ten Have,2016-02-10

The panorama of bioethical problems is different today Patients travel to Thailand for fast surgery commercial surrogate mothers in India deliver babies to parents in rich countries organs body parts and tissues are trafficked from East to Western Europe physicians and nurses migrating from Africa to the U S thousands of children or patients with malaria tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems This book provides an introduction into the new field of global bioethics Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy but that criticizes the social economic and political context that is producing the problems at global level This book argues that global bioethics is a necessity because the social economic and environmental effects of globalization require critical responses Global bioethics is not a finished product that can simply be applied to solve global problems but it is the ongoing result of interaction and exchange between local practices and global discourse It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values The book examines the nature of global problems as well as the type of responses that are needed in order to exemplify the substance of global bioethics It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices *The Forgotten Dimension of Financial Globalization* Katherine Sperling,1999
