

The background of the slide is a photograph of a large, modern concrete bridge structure, possibly a cable-stayed bridge, extending over a body of water. The bridge's massive concrete piers and girders are the primary focus, with the sky above and the water below. The sky is a clear, vibrant blue with a few wispy white clouds. The water is a deep, dark blue. The bridge structure is composed of several large, A-frame concrete piers that support the bridge deck. The perspective is from a low angle, looking up at the bridge, which emphasizes its scale and structural complexity. The overall scene is bright and clear, suggesting a sunny day.

Jovanović,2007 This book is a thorough and professional study about secession Starting from the perspective of contemporary political philosophy the book explores the relevance of this issue for the theory and practice of federalism as well as its status under current public international law and concludes with a comparative constitutional analysis of the subject matter In the final chapter it provides a constitutionalized procedure of secession based on fundamental liberal democratic values The book argues that a liberal democratic response to the secession controversy might consist of the constitutionalization of a right to secession While a number of recent works in political theory point to the fact that under certain circumstances the moral right of a group to secession should be recognized only a few of them are ready to defend

the institutionalization of that right through the instruments of constitutional law This topical and thought provoking book is a welcome contribution to the ongoing debate on secession and will be of interest to academics in a variety of disciplines such as law history politics international relations philosophy and applied ethics and to politicians and constitution drafters
