Collegiate Mathematics Education presents state of the art research on understanding teaching and learning mathematics at
the postsecondary level The articles advance our understanding of collegiate mathematics education while being readable by
a wide audience of mathematicians interested in issues affecting their own students This is a collection of useful and
informative research regarding the ways our students think about and learn mathematics The volume opens with studies on
students experiences with calculus reform and on the effects of concept based calculus instruction The next study uses
technology and the van Hiele framework to help students construct concept images of sequential convergence The volume
continues with studies on developing and assessing specific competencies in real analysis on introductory complex analysis
and on using geometry in teaching and learning linear algebra It closes with a study on the processes used in proof
construction and another on the transition to graduate studies in mathematics Whether they are specialists in education or
mathematicians interested in finding out about the field readers will obtain new insights about teaching and learning and will
take away ideas that they can use Information for our distributors This series is published in cooperation with the
