**The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes** Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K.

Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition

curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researchers persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives

[Infinite Dimensional Analysis, Quantum Probability and Applications](#) Luigi Accardi, Farrukh Mukhamedov, Ahmed Al Rawashdeh, 2022-10-04 This proceedings volume gathers

selected peer reviewed papers presented at the 41st International Conference on Infinite Dimensional Analysis Quantum Probability and Related Topics QP41 that was virtually held at the United Arab Emirates University UAEU in Al Ain Abu Dhabi from March 28th to April 1st 2021 The works cover recent developments in quantum probability and infinite dimensional analysis with a special focus on applications to mathematical physics and quantum information theory Covered topics include white noise theory quantum field theory quantum Markov processes free probability interacting Fock spaces and more By emphasizing the interconnection and interdependence of such research topics and their real life applications this reputed conference has set itself as a distinguished forum to communicate and discuss new findings in truly relevant aspects of theoretical and applied mathematics notably in the field of mathematical physics as well as an event of choice for the promotion of mathematical applications that address the most relevant problems found in industry That makes this

volume a suitable reading not only for researchers and graduate students with an interest in the field but for practitioners as well
