Bates Jensen Wound Assessment Tool Ucla:

Wound Management for the Advanced Practitioner Terry Swanson, Margo Asimus, Bill McGuiness, 2014-10-21

Increasingly wound management is recognised as a specialised area of practice. Advances in wound care products, surgical interventions and social support options create an often bewildering array of knowledge for healthcare practitioners. This textbook opens with a focus on the core elements of effective wound management: an understanding of how wounds heal and what inhibits wound healing; rigorous assessment; use of outcome measures; evidence based approaches to practice; and an understanding of how clinical research is done. Key aspects of wound bed preparation and management, diagnostic investigations, assessment and management of non viable tissue, infected wounds, dressings and technology, pharmacological therapy and acute wounds are then elucidated. Optimal management of commonly encountered wounds: venous leg ulceration, arterial and mixed arterial venous ulceration, inflammatory ulcers, pressure injury and the high risk foot and unusual wounds is described. The path to professionalisation of wound management in Australia is charted. The book ends with a list of wound care products, types, properties, uses, distributor contact details. The editors and specialist contributors to this text have aimed to build on the foundations provided by the numerous basic introductory level textbooks in the field to provide an authoritative, comprehensive and up to date textbook for wound managers who wish to further develop their knowledge and skills.

Essentials of Physical Medicine and Rehabilitation - E-BOOK Walter R. Frontera, Julie K. Silver, 2025-12-25

Clinically focused, practical and up to date, *Essentials of Physical Medicine and Rehabilitation* 5th Edition helps you prevent, diagnose and treat a wide range of musculoskeletal disorders, pain syndromes and chronic disabling conditions in day to day patient care. This concise text uses an easy to navigate format that provides quick access to well illustrated coverage of every essential topic in the field. It offers a distinct outpatient focus for rehabilitation professionals including but not limited to physicians and physicians in training who need to quickly review topics and health conditions. Provides the up to date information you need on both traditional and cutting edge interventions, designing effective treatment and rehabilitation plans and working with interdisciplinary teams that meet your patients current and changing needs. Presents each topic in a consistent, quick reference format that includes a description of the condition including ICD 10 diagnostic codes, discussion of symptoms, examination findings, functional limitations and diagnostic testing. An extensive treatment section covers initial therapies, rehabilitation interventions, ultrasound guided and other minimally invasive procedures and surgery. Includes new content on musculoskeletal conditions, regenerative rehabilitation, evolving health conditions such as long COVID and more. Contains current information in every treatment area where recently developed technologies or devices have been added to the therapeutic and rehabilitation strategies including robotic exoskeletons, wearable sensors and more. Any additional digital ancillary content may be published up to 6 weeks following the publication date.
