Ronald D. Fischer, 2001 When the La Ni na drought hit Chile in 1998 99 the country s recently reformed electricity sector
suffered a price collapse Power outages followed but were they inevitable No The electricity shortage can be blamed on the
rigid price system and deficient regulatory governance structures and reducing the magnitude of above market costs
associated with the contracts **IMF Working Paper** ,1996 □□□ , *Liability for Environmental Damages* Elga
Bartsch, 1998 From an economic point of view liability for environmental damages aims at two goals On the one hand liability
should efficiently allocate the risk imposed by the stochastic nature of environmental damages On the other hand ex post
liability should generate ex ante incentives to take appropriate precautions against environmental risk In reality
precautionary incentives generated by civil liability for environmental damages are often reduced by various impediments to
the enforcement of legal claims One of the key impediments is uncertain causation especially when precautionary pollution
control measures cannot be easily observed This book analyzes the consequences of asymmetric information regarding the
precautionary pollution control measures on enforcing legal claims and hence on the precautionary incentives The question
is discussed against the background of the 1991 German Environmental Liability Act Umwelthaftungsgesetz In the first part
of this book Elga Bartsch gives an overview of selected liability systems and then derives the conditions for an optimal
liability rule in a situation of uncertain causation and imperfect information within the principal agent framework This
theoretical discussion is followed by an empirical analysis of the impact of the German Environmental Liability Act on the
German chemicals industry by means of an event study Its results indicate that the change in the legal framework did not
have an adverse effect on the German chemicals industry Forest Science ,2004 Journal of Econometrics ,2012
