

CPP DSM4007A: Short Answer

Question 1

What is property management? Provide a concise definition.

Property management is acting on behalf of a property owner (lands or tenements) to lease and manage their interests in real estate. Management may also refer to the property manager's role in finding the tenant and setting the contractual legal management fee for the management of the tenement and property.

Question 2

What is environmental monitoring and assessment?

Environmental monitoring involves monitoring, recording, and evaluating environmental conditions.

Question 3

What is the relationship between environmental management and asset management?

An asset manager focuses on the day-to-day operations of a real property while environmental management is concerned with the long-term, bigger financial picture.

Question 4

How can the following tasks be performed by property managers?

- 1. Leasing:** Most landlords for the property management services, representing the landlord and acting as the agent for the property.
- 2. Contractual relationships:** Representing landlords, including or including prior as described by contractual property management contracts, ensuring the best management for the property.
- 3. Monitoring and assessment:** Using the monitoring and recording professional services to monitor and assess the property's condition as an environmental assessment and management.
- 4. Managing water and air:** Representing the property owner, including environmental monitoring, ensuring the property is properly managed and the environmental protection.
