

ACCOUNTING 1

Accounting Basics

Accounting Standards

- Accounting principles have been in existence since the late 1400s when devised by Luca Pacioli, an Italian mathematician, and have evolved over time.
- Modern-day accounting principles in the United States are called **generally accepted accounting principles (GAAP)**; these principles guide the work of accountants and auditors.
- The U.S. Securities and Exchange Commission (SEC) has regulatory authority over accounting principles used by public corporations.
 - The SEC is a federal agency responsible for enforcing the federal securities laws and regulating the securities industry.
 - It delegates the responsibility for the development of GAAP to the accounting profession via the **Financial Accounting Standards Board (FASB)**.
- The FASB develops new standards via due process activities that allow input from accountants and executives in business and industry.
- The **International Accounting Standards Board (IASB)** develops global accounting standards.
 - Multinational companies follow IASB standards.
 - The IASB works with other key global accounting standards bodies to create a single source of accounting standards.
- The **Government Accounting Standards Board (GASB)** sets state and local government accounting standards for accounting.
 - This is a private, nongovernmental organization subject to oversight and funding by the **Financial Accounting Foundation (FAF)**.
 - The federal government follows standards set by the FASB when performing accounting for its units.

Concepts & Principles

- Entity concept**
 - An organization stands apart from other organizations as a separate economic unit.
 - Assets and obligations must be accounted for separately from the personal resources and obligations of its owners.
- Going concern concept (i.e., continuity assumption):** The entity will continue to operate long enough to meet its contractual obligations and carry out plans.
 - Time period concept**
 - Businesses should report information at regular intervals.
 - Annual reports show income for the last 12 months and end on the last day of the fiscal year; therefore, annual reports show the financial position as of the last day of the fiscal year.
 - Public companies report based on quarterly (3-month) time intervals.
- Reliability principle**
 - Accounting records must be based on the most reliable data available.
 - Reliable information is accurate, objective (unbiased), and verifiable.
- Relevance principle**
 - Accounting information must be timely.
 - Accounting information is predictive, provides feedback, and helps decision makers.
- Cost principle:** Assets and services acquired are recorded at actual, historical cost rather than current value.
- Conservatism**
 - Care must be exercised to avoid overstating assets and revenues and understating expenses and liabilities.
 - Accounting estimates should be based on conservative assumptions.
- Revenue principle**
 - Revenue should only be recorded when earned.
 - Revenue is earned when the business has completed rendering services to the customer.
 - The amount to record is equal to the cash value of services or goods.
 - The collection of cash must be reasonably assured on credit sales.
- Matching principle**
 - Expenses must be matched against revenues in the same accounting period.
 - Costs incurred to generate revenues in a period are recognized as expenses.
- The accounting period**
 - The accounting period is the period covered by the income statement.
 - It is usually 1 year ending on Dec. 31 (when the fiscal year is the calendar year).
 - The fiscal year can end on any other date of the year chosen by management.
- Cash-basis accounting**
 - The impact of events is not recognized until cash is paid or received.
 - Revenue is recorded when cash is received; expenses are recorded when cash is paid.
 - This method is adequate for small companies that don't report to external parties, but it is not acceptable under GAAP.
- Accrual-basis accounting**
 - The impact of events is recognized as they occur.
 - Revenue is recorded when earned; expenses are recorded when incurred.
 - Transactions are recorded even when cash has not been received or paid.
 - This method is required by GAAP.

The Accounting Equation

$$\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$$

1. Assets

- A. Assets** are economic resources expected to benefit the company in the future; they result from past transactions.
- Cash:** Money, certificates of deposit, and checks.
 - Accounts receivable:** Oral or implied promises, usually arise from sales made to customers whose no promissory note exists.
 - Notes receivable:** Promissory notes; a signed note usually with payment stipulations such as time period and interest rate.
 - Inventory:** Merchandise the entity holds or manufactures to sell.
 - Supplies:** Assets used in the everyday running of the business; examples include office and cleaning supplies.
 - Prepaid expenses:** Expenditures for goods and services to be received in the future.
 - Land:** Property the business owns and uses in operations.
 - Buildings:** Cost of an office, warehouse, garage, etc.
 - Equipment, furniture, and fixtures:** Cost of office and store equipment.
- B. Assets** are listed on the balance sheet in order of liquidity.
- C. Assets** are listed according to current versus long-term status.
- Liabilities:** Economic obligations or debts; probable sacrifices of assets resulting from past transactions.
 - Accounts payable:** Oral or implied promises to pay debts that arise from credit purchases.
 - Notes payable:** Amounts the company must pay as a result of signing a promissory note for goods or services.
 - Taxes payable:** Wages and salaries payable.
 - Unearned revenues:** Money received for services not yet fulfilled or products not yet delivered; examples include cash received for airline tickets (flights not yet flown), subscriptions (magazines not yet delivered), or season tickets (games not yet played).
 - Owners' equity:** Claims held by owners; the difference between assets and liabilities; divided into two main categories:
 - Contributed (or paid-in) capital:** Amounts invested in the corporation by its owners.
 - Par value stock:** The value printed on a share certificate; generally a small, arbitrary value.
 - Paid-in capital in excess of par:** The total amount of capital raised in a sale of stock, less the par value of that stock.

(**Ex:**) 1,000 shares of \$2 par value stock sold for \$10 per share; paid-in capital in excess of par would be \$8,000 (total capital of \$10,000 less \$2,000 of par value).
 - Retained earnings:** Income earned from operations.
 - Expenses:** Decreases in retained earnings resulting from operations.
 - Revenues:** Increases in retained earnings resulting from operations.
 - Dividends:** Distributions of assets to shareholders; decreases in retained earnings.
 - Change in retained earnings:** Beginning Retained Earnings + Net Income (or - Net Loss) - Dividends.

Financial Statements: Formal Reports of an Entity

Balance Sheet (Statement of Financial Position)

- Assets are balanced with the sum of liabilities and owners' equity as of a specific date.
- Prepared after the income statement and the statement of retained earnings.
- Current assets**
 - Cash and other resources expected to be cash, sold, or used up during the normal operating cycle of the business (usually 1 year).
 - Typical current assets: Cash, receivables, inventories, investments, supplies, and prepaid expenses.
- Noncurrent assets**
 - Assets that are not current assets.
 - Typical noncurrent assets: Buildings, equipment, furniture, fixtures, land, natural resources, and intangible assets (patents and goodwill).
- Current liabilities**
 - Obligations that will be paid within the operating cycle (usually 1 year).
 - Typical current liabilities: Accounts payable, wages and salaries payable, taxes payable, unearned revenues, and short-term notes payable.
- Noncurrent liabilities**
 - Liabilities that are not current liabilities.
 - Typical noncurrent liabilities: The noncurrent portion of any payable liabilities, capital leases, pension benefit obligations, and long-term obligations under product or service warranties.
- Equity**
 - The difference between assets and liabilities.
 - Typical equity: Capital contributed by owners and retained earnings.

Company Balance Sheet for Year Ended Dec. 31, 20XX

ASSETS

CURRENT ASSETS:		
Cash		\$58,280
Accounts receivable	50,300	
Allowance for doubtful accounts	(3,100)	47,200

Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based

access to a wide range of Accounting 1 Quick Study Business eBooks, including some popular titles.

FAQs About Accounting 1 Quick Study Business Books

What is a Accounting 1 Quick Study Business PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Accounting 1 Quick Study Business PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Accounting 1 Quick Study Business PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Accounting 1 Quick Study Business PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Accounting 1 Quick Study Business PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
