(d) Since tax returns are filed for separate legal entities and not the consolidated entity, the fair value excess in a business combination is not considered to be a deductible cost for tax purposes. If the asset acquired in a business combination were subsequently sold at its fair value, a gain would be reported for tax purposes and tax would be payable even though no gain would be realized from an accounting perspective. The tax obligation is reported as a deferred tax liability on the consolidated financial statements at the date of acquisition.
