extraordinary wealth seems to arrive from nowhere The trick of conjuring this unearned wealth is in fact the key to understanding capitalism's origins and a clue to why the catastrophe of climate collapse is upon us value is created by consuming the future The Alibi of Capital explains how this came about through the imperial expansion of the West encumbering today's generations with repayments on earlier extractions Timothy Mitchell identifies the forms of capitalisation credit and coercion that turn prospective assets into present income Rejecting the common idea that claims on the future create only financial or fictitious capital he traces the terraforming projects the destruction of rivers the colonising of territory the expansion of infrastructure and the burning of carbon through which the future has been squandered Terms such as finance technology the economy and growth function as alibis that conceal this devastating form of extraction
