

Aci And Ground Handling

Clifford Lane

Aci And Ground Handling:

Lobbying in the European Commission Dinos Kyrou, 2019-07-23 First published in 2000 this volume examines the role of industry representation in the EU in the case of the air transport industry Air transport has contributed to areas including member state interdependence national defence in foreign policy considerations and national identity in terms of flag carrier airlines Dinos Kyrou looks at specific case studies concerning aspects of integration of the air transport sector within the European Union These case studies an examination of a European Commission Proposal for a Council Directive and the attempt by the Commission to formulate a Proposal for a Council Regulation are stages in the process of policy formulation which are aimed at enhancing the liberalisation which was completed de jure in 1992 In both cases the increasing prominence of the Competition Directorate of the European Commission DGIV has been evident Kyrou s question is whether this reflects a restoration or a creation of pride and self

Liberalization in Aviation Hartmut Wolf, Peter Forsyth, David Gillen, Kai Hüscherlath, Hans-Martin Niemeier, 2016-05-06 The last few decades have witnessed substantial liberalization trends in various industries and countries Starting with the deregulation of the US airline industry in 1978 regulatory restructuring took place in further network industries such as telecommunications electricity or railways in various countries around the world Although most of the liberalization movements were initially triggered by the worrying performances of the respective regulatory frameworks increases in competition and corresponding improvements in allocative and productive efficiency were typically associated with the respective liberalization efforts From an academic perspective the transition from regulated industries to liberalized industries has attracted a substantial amount of research reflected in many books and research articles which can be distilled to three main questions 1 What are the forces that have given rise to regulatory reform 2 What is the structure of the regulatory change which has occurred to date and is likely to occur in the immediate future 3 What have been the effects on industry efficiency prices and profits of the reforms which have occurred to date Liberalization in Aviation brings together renowned academics and practitioners from around the world to address all three questions and draw policy conclusions The book is divided into five sections in turn dealing with aspects of competition in various liberalized markets the emergence and growth of low cost carriers horizontal mergers and alliances infrastructures and concluding with economic assessments of liberalization steps so far and proposed steps in the future

Economic Regulation of Airports Di Mei, 2025-11-14 This book explores airport charges regulation presenting a fresh perspective on a crucial yet marginalized subject Providing a clear pathway for regulation of the economic aspects of airports specifically charges the book employs an adaptable approach grounded in private law principles Challenging the conventional command and control model of traditional regulation that once governed airports the book contends that an agile private law approach offers a more responsive and efficient means of overseeing airport charges in the face of increasing complexity within the industry Within this overarching approach two key instruments emerge First the book demonstrates the effectiveness of

contracts as a powerful tool for integrating regulations on airport charges Second the cultivation of robust corporate governance is posited as a mechanism that naturally instigates effective regulation Through illuminating the efficacy of a private law approach the book demonstrates how this innovative approach not only works as a regulatory mechanism for airport charges but can also be applied within the broader spectrum of infrastructure regulation The book will be of interest to researchers in the field of air law contract law corporate law competition law and aviation business and management employing case studies to illustrate its points

Airport Competition Peter Forsyth,David Gillen,Jurgen Muller,Hans-Martin Niemeier,2016-03-23 The break up of BAA and the blocked takeover of Bratislava airport by the competing Vienna airport have brought the issue of airport competition to the top of the agenda for air transport policy in Europe Airport Competition reviews the current state of the debate and asks whether airport competition is strong enough to effectively limit market power It provides evidence on how travellers chose an airport thereby altering its competitive position and on how airports compete in different regions and markets The book also discusses the main policy implications of mergers and subsidies
