

NCERT Solutions

Question. 1. What is sound and how is it produced?

Solution. Sound is a form of energy which makes us hear. Sound is produced when objects vibrate (moves back and forth rapidly). For example, sound can be produced:

- By vibrating strings (as in a sitar)
- By vibrating air (as in a flute)
- By vibrating membranes (as in a drum), and
- By vibrating plates (as in cymbals)

NCERT Solutions

Question. 2. Describe with the help of a diagram, how compressions and rarefactions are produced in air near a source of sound.

Solution. When a vibrating body moves forward, it creates a region of high pressure in its vicinity. This region of high pressure is known as compressions. When it moves backward, it creates a region of low pressure in its vicinity. This region is known as a rarefaction. As the body continues to move forward and backwards, it produces a series of compressions and rarefactions. This is shown in below figure.
