

REVIEW QUESTIONS

Note: Questions 6-2, 6-7, and 6-8 require knowledge about the relation between the area under the marginal cost curve and total costs. This relation is not examined in detail in the book. An instructor should review this relation in class before assigning these problems.

6-1. What four basic conditions characterize a competitive market?

- **A large number of either actual or potential buyers and sellers.**
- **Product homogeneity.**
- **Rapid dissemination of accurate information at low cost.**
- **Free entry and exit in the market.**

6-2. The short-run marginal cost of the Ohio Bag Company is $2Q$. Price is \$100. The company operates in a competitive industry. Currently, the company is producing 40 units per period. What is the optimal short-run output? Calculate the profits that Ohio Bag is losing through suboptimal output.

The optimal short-run output is where marginal cost = marginal revenue (in this case price). Therefore, the optimal output is 50 units. Current profits are $TR - TC = \$4,000 - \$1,600 = \$2,400$. Note: assuming no fixed costs, total costs are equal to the area under the marginal cost curve (area = $1/2BH$). Profits with optimal output = $\$5,000 - \$2,500 = \$2,500$. The firm is forgoing \$100 through suboptimal output choice.

6-3. Should a company ever produce an output if the managers know it will lose money over the period? Explain.

The firm should operate in the short run, as long as it obtains enough revenue to cover its variable costs. Revenue in excess of variable costs helps to cover fixed costs (which are incurred even if the firm does not operate).

B2B Content Marketing and Buyer Stage. How to Engage Website Visitors with Appropriate Content Kim-Cheyenne Greiner,2020-10-26 Master s Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1 2 Zurich University of Applied Sciences language English abstract This Master s thesis explores whether there are content stimuli that are best suited to a specific stage of the customers buying cycle In other words is there a

connection between the engagement of website visitors and their current stage within the buying cycle To study this relationship an external webpage of IBM and its sub pages are used to analyze webpage visitors click and scroll behavior and to assess their interest in the presented content assets The exploratory investigation was undertaken based on three online surveys with a total sample of 234 participants The age of classical advertising is over The introduction of digital technology and the spread of the Internet have led to radical changes in the way companies meet the expectations and interests of their stakeholders In digital communication content marketing plays a major role in achieving business benefits In fact valuable B2B content marketing initiatives can drive website traffic customer engagement and inbound leads which yield sales and retain customers In the context of this digital environment companies increasingly aim to provide relevant engaging content assets to acquire new leads and create business benefits This raises the following question What digital content assets encourage website visitor engagement and how does this relate to customer progress in the B2B buying cycle According to the literature content that is consistent timely and contains exclusivity messages that matter to the target audience lead to engagement However engagement is obviously dependent on individual customer needs motives and goals It should therefore be interesting for companies to know how to turn their website visits into engaged visits but research on engagement combined with content marketing is scarce especially in the B2B context

Bureau of Agricultural Economics,1928 Taking Traditional Knowledge to the Market Maarten Bode,2008 Taking Traditional Knowledge to the Market explores the paradox at the heart of the ayurvedic and unani medicine manufacturing industry to present itself as modern and traditional common and professional at the same time On the one hand the natural wholesome and authentic nature of these medicines is juxtaposed with the synthetic violent and iatrogenic character of western medicines which dominate the Indian market They are linked to Indian popular culture the heyday of Indian civilisation and a humane approach to medicine At the same time large ayurvedic and unani manufacturers use modern science and technology to create a competitive edge and distance themselves from the image of backwardness that also sticks to Indian medical traditions Based on an ethnographic fieldwork

from 1996 to 2002 Maarten Bode studies five Indian ayurvedic and unani medicine firms Hamdard Zandu Dabur Himalaya and Arya Vaidya Sala The narrative follows the perspective of these manufacturers and hence provides an insight into the categorisations and the characteristics of the consumer Bode also reveals that researches conducted by large ayurvedic and unani manufacturers on their best selling brands follow logic positivistic and biomedical lines often ignoring humoral concepts and classical pharmacological notions *Refrigerating World* ,1925 **Reports of Cases Argued and Decided in the Supreme Court of the State of Texas** Texas.
