Patrick Boyde,1981 This book is devoted to a full and lucid exposition of Boyde s ideas In the first two parts the author  
presents a systematic account of the universe as Dante accepted it and explains the processes of creation and generation as  
they operate in the non human parts of the cosmos Dr Boyde then shows how the two processes combine in Dante s theory of  
human embryology and how this combination affects the issues of love choice and freedom The third and last part of the book  
consolidates these expository sections with a generous selection of quotations from Dante s authorities and from his own  
works in prose At the same time the book offers far more than a clear account of Dante s cosmology and anthropology Dr  
Boyde is interested in Dante s ideas in so far as they inspired and gave shape to the Divine Comedy Furthermore in every  
chapter he demonstrates how the relevant concepts and habits of thought were transmuted into imagery symbolism and  
dramatic scenes or simply transformed by the energy and concision of Dante s poetic style *The American Historical*
