The computer plays a vital role in the development of any company it also saves some of the complex problems that are been faced by man and processes voluminous data within a short time or at an incredible speed (Kumar, 2016).

The rapid advancement of mobile technology has significantly transformed various aspects of our lives, including how we engage in commerce and interact within our communities. College and university students, in particular, form a vibrant and dynamic community that often requires a convenient and efficient platform to buy, sell, and trade items within their local campus environment. Traditional methods of classified advertisements and physical bulletin boards are no longer adequate to meet the diverse needs and preferences of modern students.

The emergence of mobile applications has opened up new possibilities for facilitating peer-to-peer transactions and fostering community engagement among students. The
