## How Grammaticalization Processes Create Grammar:

Handbook of Cognitive Linguistics Ewa Dabrowska, Dagmar Divjak, 2015-05-19 Cognitive Linguistics is an approach to language study based on the assumptions that our linguistic abilities are firmly rooted in our cognitive abilities that meaning is essentially conceptualization and that grammar is shaped by usage The Handbook of Cognitive Linguistics provides state of the art overviews of the numerous subfields of cognitive linguistics written by leading international experts which will be useful for established researchers and novices alike It is an interdisciplinary project with contributions from linguists psycholinguists psychologists and computer scientists which will emphasise the most recent developments in the field in particular the shift towards more empirically based research In this way it will we hope help to shape the field encouraging methodologically more rigorous research which incorporates insights from all the cognitive sciences Editor Ewa Dabrowska was awarded the Alexander von Humboldt Professorship 2018

*Cognitive Linguistics - Key Topics* Ewa Dabrowska, Dagmar Divjak, 2019-07-08 The key topics discussed in this book illustrate the breadth of cognitive linguistic research and include semantic typology space fictive motion argument structure constructions and prototype effects in grammar New themes such as individual differences emergence and default non salient interpretations also receive coverage

**Grammaticalization and Language Change** Kristin Davidse, Torsten Leuschner, 2012 This collective volume focuses on the latest developments in the study of grammaticalization and related processes of change such as degrammaticalization constructionalization lexicalization and petrification It addresses topical issues relating to the motivations sources defining features and outcomes of these changes New theoretical reflections are offered on the pragmatic motivation of grammaticalization paths process oriented differences between grammaticalization lexicalization and degrammaticalization the question of gradualness and pace of grammaticalization and deictics as a distinct source of grammaticalization The articles describe various constructional and distributional changes affecting deictics determiners reflexives clitics nouns affixes adverbs and auxiliary verbs mainly in the Germanic and Romance languages The volume will be of great interest to historical linguists working on grammaticalization and related changes and to all linguists working on the interface between morphosyntax semantics pragmatics and discourse

**The Genesis of Grammar** Bernd Heine, Tania Kuteva, 2007-10-04 This book reconstructs what the earliest grammars might have been and shows how they could have led to the languages of modern humankind It considers whether these languages derive from a single ancestral language what the structure of language was when it first evolved and how the properties associated with modern human languages first arose

**Language, Usage and Cognition** Joan Bybee, 2010-04-01 Language demonstrates structure while also showing considerable variation at all levels languages differ from one another while still being shaped by the same principles utterances within a language differ from one another while exhibiting the same structural patterns languages change over time but in fairly regular ways This book focuses on the dynamic processes that create languages and give them their structure and variance It outlines a theory of language that

addresses the nature of grammar taking into account its variance and gradience and seeks explanation in terms of the recurrent processes that operate in language use The evidence is based on the study of large corpora of spoken and written language what we know about how languages change as well as the results of experiments with language users The result is an integrated theory of language use and language change which has implications for cognitive processing and language evolution

**Grammaticalization** Paul J. Hopper, Elizabeth Closs Traugott, 2003-07-31 This is a general introduction to grammaticalization the change whereby lexical terms and constructions come in certain linguistic contexts to serve grammatical functions and once grammaticalized continue to develop new grammatical functions The authors synthesize work from several areas of linguistics including historical linguistics discourse analysis and pragmatics Data are drawn from many languages including Ewe Finnish French Hindi Hittite Japanese Malay and especially English This 2003 second edition has been thoroughly revised with substantial updates on theoretical and methodological issues that have arisen in the decade since the first edition and includes a significantly expanded bibliography Particular attention is paid to recent debates over directionality in change and the role of grammaticalization in creolization Grammaticalization will be a valuable and stimulating textbook for all linguists interested in the development of grammatical forms and will also be of interest to readers in anthropology and psychology
