Economic Approaches to Organizations Sytse Douma, Hein Schreuder, 2017 Assuming no previous knowledge of economics this text offers an introduction to the use of economics in organisation and management **Leading Through** Kim B. Clark, Jonathan R. Clark, Erin E. Clark, 2024-09-17 Generative AI and the remote work revolution show us every day that we re in a new era The rules and norms have changed and so must leadership And yet coercive bureaucracy hierarchy and control old ways of thinking and working are still with us a deep seated and powerful legacy We are living through a profound transition from an old industrial era to a new one that is digital transparent and complex In this important new book by former dean of Harvard Business School Kim Clark written with his business school professor son Jonathan and management consultant daughter Erin the dynamic struggle between two competing paradigms of leadership is compellingly illustrated an old paradigm that involves control and power over people versus a new one that enables and inspires power through people With rich examples and stories the authors show how deeply ingrained the legacy model of leadership remains and how destructive it is causing waste and loss of human potential stifling innovation and ultimately resulting in what the authors call organizational darkness They go on to articulate a new positive model one that consciously seeks to do good and to make things better that cares for people helping them to thrive and that mobilizes people to solve tough problems These three elements they argue are the soul heart and mind of leadership and activating them requires careful attention to both the personal and the organizational dimensions of leadership The narrative is interwoven with probing analysis and reflection and the authors speak clearly and frankly about the moral aspects and impact of leadership They also provide a concrete frame and approach for scaling the new model and creating a vibrant leadership system **Leading Through** is a deep and essential account of the evolution of our leadership thinking and practice that is both timely and timeless

Semi-State Actors in Cybersecurity Florian J. Egloff, 2022 The universe of actors involved in international cybersecurity includes both state actors and semi and non state actors including technology companies state sponsored hackers and cybercriminals Among these are semi state actors actors in a close relationship with one state who sometimes advance this state s interests but are not organizationally integrated into state functions In Semi State Actors in Cybersecurity Florian J Egloff argues that political relations in cyberspace fundamentally involve concurrent collaboration and competition between states and semi state actors To understand the complex interplay of cooperation and competition and the power relations that exist between these actors in international relations Egloff looks to a historical analogy that of mercantile companies privateers and pirates Pirates privateers and mercantile companies were integral to maritime security between the 16th and 19th centuries In fact privateers and mercantile companies like today s tech companies and private cyber contractors had a particular relationship to the state in that they conducted state sanctioned private attacks against foreign vessels Pirates like

independent hackers were sometimes useful allies and other times enemies These actors traded explored plundered and controlled sea lanes and territories across the world s oceans with state navies lagging behind often burdened by hierarchy Today as cyberspace is woven into the fabric of all aspects of society the provision and undermining of security in digital spaces has become a new arena for digital pirates privateers and mercantile companies In making the analogy to piracy and privateering Egloff provides a new understanding of how attackers and defenders use their proximity to the state politically and offers lessons for understanding how actors exercise power in cyberspace Drawing on historical archival sources Egloff identifies the parallels between today s cyber in security and the historical quest for gold and glory on the high seas The book explains what the presence of semi state actors means for national and international security and how semi state actors are historically and contemporarily linked to understandings of statehood sovereignty and the legitimacy of the state

Growth in the Age of Complexity: Steering Your Company to Innovation, Productivity, and Profits in the New Era of Competition Andrei Perumal,Stephen A. Wilson,2017-12-01 A new lens on growth and a critical set of strategies for navigating a complex world Growth is rarely in a straight line It is tempting to think otherwise

particularly when looking in the rear view mirror but anyone faced with plotting the coordinates for a company's growth knows the fallacy of this notion. As much as we like to think of corporate leaders executing sure-fire growth strategies, the truth is far messier: it's more an act of exploration and discovery than a step-by-step process. In *Growth in the Age of Complexity*, the authors describe in detail how complexity has impacted businesses and the markets in which they compete and the strategies, mindsets, and skillsets required to grow profitably. New strategies are required to navigate the Sirens of Growth: the growth plans borne of Industrial Age mindsets that too frequently lead to complexity vs. scale. In addition, companies need to develop an Explorer's Mindset and a Navigator's Skillset to sustain performance. You'll discover how to assess where you're truly making money, reignite your core products and services to drive growth, incorporate experimentation as a key way to discover new opportunities, create an operating model for scale, location, and replication, identify new markets where you are positioned to win, and understand the fundamentals for executing in a distributed organization. This book is an invaluable tool for achieving growth and maintaining a competitive advantage in virtually any business.
