Section 2.1

<https://open.lib.umn.edu/sociology/chapter/2-1-sociology-as-a-social-science/>

Read through the section and answer the following questions. You must highlight your responses.

1. When we say that sociology is a social science, we mean that it uses the **Scientific Method** to try to understand the many aspects of society that sociologists study.
2. An important goal is to yield **Generalizations**—general statements regarding trends among various dimensions of social life.
 - a. Stereotypes
 - b. Generalizations**
 - c. Common sense
 - d. Personal experiences
3. Why is sociology so different from other social sciences like physics? **Sociology is different from other social sciences because Sociology can help us understand the social forces that affect our behavior, beliefs, and life chances, but it can only go so far. Physics is more like science because it teaches us about how the universe behaves.**
4. List the 5 sources where individuals get their knowledge: **Social Media, Personal Experience, the Scientific Method, Traditions, Expert Authorities.**
5. Although personal experiences are very important, not everyone has the **same** personal experience.
6. Why is common sense not a reliable source of knowledge?
 - a. Not everyone has it**
 - b. It varies from culture to culture
 - c. It can contradict itself
 - d. Only women have it (actually, this could be right...)
7. What are the two issues with the way the media covers topics and news? **You don't even know if it's fake or real. So many media pages and News are sometimes fake news or false information to make u think a certain way.** Expert authorities, such as **teachers, parents,** and government officials, are a fourth source that influences our understanding of social reality.
8. Why can't individuals always trust "expert authorities"? They can't trust "expert authorities" because the evidence may not be updated to the fullest or it can also be false. Tradition is generally valuable, because a society should always be aware of its **Roots**. However, traditional ways of thinking about social reality often turn out to be **inaccurate** and **incomplete**.
9. The scientific method is followed in the natural, physical, and social sciences to help yield the most **accurate** and reliable conclusions possible, especially ones that are free of **bias** or methodological errors.
10. Which of the following is NOT one of the four steps in the scientific method?
 - a. Formulating a theory
 - b. Measuring and gathering data
 - c. Analyzing data
 - d. Publishing your research**

Chapter 25 Section 1 Guided Reading:

A Guide to Marx's 'Capital' Vols I-III Kenneth Smith,2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's Capital with advice on further reading and points for further discussion Recognizing the contemporary relevance of Capital in the midst of the current financial crisis Kenneth Smith has produced an essential guide to Marx's ideas particularly on the subject of the circulation of money capital This guide uniquely presents the three volumes of Capital in a different order of reading to that in which they were published placing them instead in the order that Marx himself sometimes recommended as a more user friendly way of reading Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production CMP has been undermined by the existence of a non capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop While the guide can be read as a book in its own right it also contains detailed references to Volumes I III so that students seminars and discussion groups can easily make connections between Smith's explanations and the relevant parts of Capital
