By taking precise control of your application development process you can make changes both large and small throughout your project's life cycle that will lead to better quality finished products that are consistently delivered on time and within budget. Application lifecycle management (ALM) is an area of rapidly growing interest within the development community. Because its techniques allow you to deal with the process of developing applications across many areas of responsibility and across many different disciplines its effects on your project can be wide ranging and pronounced. It is a project management tool that has practical implications for the whole team from architects to designers from developers to testers. Pro Application Lifecycle Management with Visual Studio 2012 focuses on the most powerful ALM tool available for the Microsoft .NET Framework: Visual Studio Team Foundation Server.
