WASHINGTON, Oct. 22 (AP)—President John F. Kennedy today ordered a naval blockade of Cuba to prevent the island from receiving more Soviet-made nuclear weapons and other military hardware.

The president's order, which is expected to be signed within the hour, is the first time since World War II that the United States has imposed a blockade on another country.

The blockade will be enforced by the U.S. Navy's Seventh Fleet, which is currently operating in the Caribbean Sea. The fleet will be ordered to stop and search all ships suspected of carrying arms to Cuba.

President Kennedy said in a televised address that the United States has no intention of invading Cuba. He said that the United States is determined to prevent Cuba from becoming a nuclear-armed state.

The president's order is a direct response to the discovery of Soviet nuclear missiles in Cuba. The missiles were discovered by U.S. reconnaissance planes on Oct. 16.

The Soviet Union has denied the presence of nuclear missiles in Cuba. It has said that the missiles are for the defense of Cuba against a possible U.S. invasion.

The United States has said that the missiles are a clear and present danger to the Western Hemisphere. It has said that the missiles could be used to launch a nuclear attack on the United States.

The blockade is expected to last until the Soviet Union agrees to remove the missiles from Cuba. The United States has said that it will not lift the blockade until the missiles are removed.

The blockade is a major escalation of the Cold War. It is a test of the will of the United States and the Soviet Union. It is a test of whether the United States is willing to stand up to Soviet aggression.

The blockade is also a test of the will of the Cuban people. It is a test of whether they are willing to stand up to Soviet domination.

The blockade is a test of the will of the world. It is a test of whether the world is willing to stand up to Soviet aggression.

*Human Rights and the Digital Divide* Anne Peacock, 2019-06-03 The Internet's importance for freedom of expression and other rights comes in part from the ability it bestows on users to create and share information rather than just receive it. Within the context of existing freedom of expression guarantees, this book critically evaluates the goal of bridging the digital divide, the gap between those who have access to the Internet and those who do not. Central to this analysis is the examination of two questions: first, is there a right to access the Internet, and if so, what does that right look like and how far does it extend? Second, if there is a right to access the Internet, is there a legal obligation on States to overcome the digital divide? Through examination of this debate's history, analysis of case law in the European Court of Human Rights and Inter-American Court of Human Rights, and a case study of one digital inclusion programme in Jalisco, Mexico, this book concludes that there is indeed currently a legal right to Internet access, but one that is very limited in scope. The 2012 Joint Declaration on Freedom of Expression and the Internet is aspirational in nature rather than a representative summary of current protections afforded by the international human rights legal framework. This book establishes a critical foundation from which some of these aspirations could be advanced in the future. The digital divide is not just a human rights challenge; nor will it be overcome through human rights law alone. Nevertheless, human rights law could and should do more than it has thus far.

**Transnational Civil Society in China** J. Chen, 2012-09-01 This book discusses the penetration, growth, and operation of transnational civil society (TCS) in China. It explores impacts on the incremental development of China's political pluralism, mainly through exploring the influences of the leading TCS actors on the country's bottom-up and self-governing activist NGOs that have sprung up spontaneously in terms of capacities, strategies, leadership, and political outlook as a result of complex interactions between the two sectors.

**International Law and the Use of Force** Christine Gray, 2018-02-09 This book explores the large and controversial subject of the use of force in international law. It examines not only the use of force by states but also the role of the UN in peacekeeping and enforcement action and the increasing role of regional organizations in the maintenance of international peace and security. The UN Charter framework is under challenge: Russia's invasion of Georgia and intervention in Ukraine, the USA's military operations in Syria and Saudi Arabia's campaign to restore the government of Yemen by force all raise questions about the law on intervention. The war on terror that began after the 9/11 terrorist attacks on the USA has not been won. It has spread far beyond Afghanistan; it has led to targeted killings in Pakistan, Somalia, and Yemen, and to intervention against ISIS in Iraq and Syria. Is there an expanding right of self-defence against non-state actors? Is the use of force effective? The development of nuclear weapons by North Korea has reignited discussion about the legality of pre-emptive self-defence. The NATO-led operation in Libya increased hopes for the implementation of responsibility to protect, but it also provoked criticism for exceeding the Security Council's authorization of force because its outcome was regime change. UN peacekeeping faces new challenges, especially with regard to the

protection of civilians and UN forces have been given revolutionary mandates in several African states But the 2015 report Uniting Our Strengths reaffirmed that UN peacekeeping is not suited to counter terrorism or enforcement operations the UN should turn to regional organizations such as the African Union as first responders in situations of ongoing armed conflict
