

10. If you are given different frequency table, which method will be the most appropriate?

Answer:

1. If the data is given in frequency table, then we will use the pie chart.

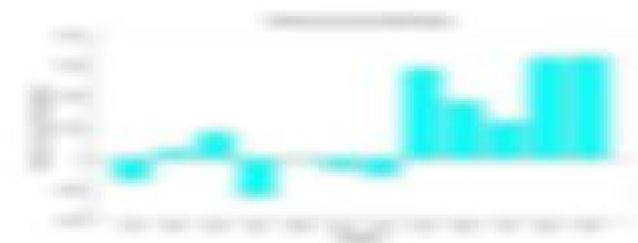

Example: The following table represents the distribution of marks obtained by the 100 students in the 100 marks test. **Draw the pie chart.**

Answer:

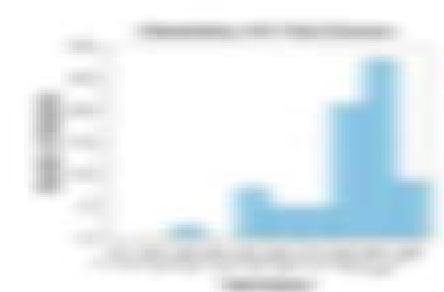

1. In the graph, the height of rectangular bars is called the height of the bar representing the number of items in each category.

Example: The following bar graph shows the number of items in each category. Draw the bar graph to represent the number of items in each category.

Answer:

2. In histogram, the height of each bar represents the frequency of the corresponding class. Therefore, the bars represent classes and their height are corresponding to their frequencies.
