Statistics for Criminal Justice and Criminology in Practice and Research Jack Fitzgerald, Jerry Fitzgerald, 2013-01-17

Statistics for Criminal Justice and Criminology in Practice and Research is an engaging and comprehensive introduction to the study of basic statistics for students pursuing careers as practitioners or researchers in both Criminal Justice and Criminology programs This student friendly text shows how to calculate a variety of descriptive and inferential statistics recognize which statistics are appropriate for particular data analysis situations and perform hypothesis tests using inferential statistics But it is much more than a cook book It encourages readers to think critically about the strengths and limitations of the statistics they are calculating as well as how they may be misapplied and misleading Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day to day activities

Modern Mathematical Statistics with Applications Jay L. Devore, Kenneth N. Berk, 2011-12-06 Many mathematical statistics texts are heavily oriented toward a rigorous mathematical development of probability and statistics without much attention paid to how statistics is actually used In contrast *Modern Mathematical Statistics with Applications* Second Edition strikes a balance between mathematical foundations and statistical practice In keeping with the recommendation that every math student should study statistics and probability with an emphasis on data analysis accomplished authors Jay Devore and Kenneth Berk make statistical concepts and methods clear and relevant through careful explanations and a broad range of applications involving real data The main focus of the book is on presenting and illustrating methods of inferential statistics that are useful in research It begins with a chapter on descriptive statistics that immediately exposes the reader to real data The next six chapters develop the probability material that bridges the gap between descriptive and inferential statistics Point estimation inferences based on statistical intervals and hypothesis testing are then introduced in the next three chapters The remainder of the book explores the use of this methodology in a variety of more complex settings This edition includes a plethora of new exercises a number of which are similar to what would be encountered on the actuarial exams that cover probability and statistics Representative applications include investigating whether the average tip percentage in a particular restaurant exceeds the standard 15% considering whether the flavor and aroma of Champagne are affected by bottle temperature or type of pour modeling the relationship between college graduation rate and average SAT score and assessing the likelihood of O ring failure in space shuttle launches as related to launch temperature

Statistics for Social Understanding Nancy E. Whittier, Tina Wildhagen, Howard J. Gold, 2024-08-06

Statistics for Social Understanding introduces statistics as it is used in the social sciences as a tool for advancing understanding of the social world The authors provide thorough coverage of social science statistical topics a balanced

approach to calculation and step by step directions on how to use both SPSS and Stata software giving students the ability to analyze data and explore exciting questions In Depth boxes encourage critical thinking by tackling tricky statistical queries and each chapter concludes with a chapter summary a section on using Stata a section on using SPSS and practice problems All problems have been accuracy checked by an outside panel of reviewers Readily available datasets for classroom use include material from institutions such as the American National Election Study General Social Survey World Values Survey and the School Survey on Crime and Safety Statistics for Social Understanding is accompanied by a learning package written entirely by author Tina Wildhagen that is designed to enhance the experience of both instructors and students

Statistics Richard A. Johnson,2009-12-09 Johnson provides a comprehensive accurate introduction to statistics for business professionals who need to learn how to apply key concepts The chapters have been updated with real world data to make the material more relevant The revised pedagogy will help them contextualize statistical concepts and procedures The numerous examples clearly demonstrate the important points of the methods New What Will We Learn opening paragraphs set the stage for the material being discussed Using Statistics Wisely boxes summarize key lessons In addition Statistics in Context sections give business professionals an understanding of applications in which a statistical approach to variation is needed
