Basic College Mathematics: An Applied Approach Richard N. Aufmann, Joanne Lockwood, 2013-01-01. As in previous editions, the focus in BASIC COLLEGE MATHEMATICS remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples and then providing them with the opportunity to immediately solve similar problems helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear objective-based approach allows students to organize their thoughts around the content and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Tenth Edition also features a new design enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Basic College Mathematics K. Elayn Martin-Gay, 1999. [Basic College Mathematics](#) Richard N. Aufmann, Vernon C. Barker, Joanne S. Lockwood, 1999. **Basic College Mathematics** Julie Miller, 2014-01-10. Get Better Results with high quality content, exercise sets, and step-by-step pedagogy. The Miller O'Neill Hyde author team continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Basic College Mathematics. The text reflects the compassion and insight of its experienced author team with features developed to address the specific needs of developmental level students. Throughout the text, the authors communicate to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. Also included are Problem Recognition Exercises designed to help students recognize which solution strategies are most appropriate for a given exercise. These types of exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance learning. Its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor.
