Psychology in the Justice System Jared Linebach, Lea Kovacsiss, 2016-08-17 A PDF excerpt from the book can be found at www.psychandcrime.org The purpose of this book is to introduce aspects of forensic psychology that the reader may not realize are relevant to this field Forensic psychology can be broadly defined as any area of the legal system where psychology is applied or consulted This broad definition is integral to the book's foundation as seemingly disjointed topics are weaved together under the overarching umbrella of forensic psychology When one thinks about the utilization of psychology in the legal system thinking most often begins with some concept of criminal profiling While profiling criminals is an aspect of forensic psychology it is only a small portion Within forensic psychology there are two distinct areas in which forensic psychologists operate The two vastly different areas are Practical Clinical focuses on the ever present needs of individuals in the legal system Research focuses on gathering and compiling data in a useful manner Clinicians focus on populations close to the legal system such as jail or prison inmates correctional officers and police officers Researchers may also focus on populations close to the legal system but are not limited to those individuals Researchers may for example be interested in the public's perception of a proposed new law or how closely a constituency agrees with a sheriff's stances on certain issues While both of these areas are important the purpose of this book is not to explore the distinctions between them Herein you will find topics relevant to forensic psychology in the broad sense but still related to its major subfields including criminal psychology police and investigative psychology correctional psychology legal psychology and victimology [Public Opinion and Criminal Justice](#) Jane Wood, Theresa A. Gannon, 2013-05-13 Public opinion is vital to the functioning of the criminal justice system but it is not at all clear how best to establish what this is and what views people have on different aspects of criminal justice and the criminal justice system Politicians and the media often assume that the public wants harsher tougher and longer sentences and policies may be shaped accordingly Detailed research and more specific polling often tells a different story This book is concerned to shed further light on the nature of public views on criminal justice paying particular attention to public opinion towards specific types of offenders such as sex offenders and mentally disordered offenders In doing so it challenges many enduring assumptions regarding people's views on justice and confronts the myths that infect our understanding of what people think about the criminal justice system [Familiarity and Conviction in the Criminal Justice System](#) Joanna Pozzulo, Emily Pica, Chelsea Sheahan, 2019 Eyewitnesses are likely to have some degree of familiarity with a perpetrator when a crime is committed Despite the fact that the majority of crimes are committed by someone with whom the victim witness is familiar the majority of eyewitness research has focused on the identification of stranger perpetrators It is critical to examine how familiarity may influence eyewitness accuracy Familiarity can vary from a complete stranger to a very familiar other This book explores the middle ground as it relates to the Criminal Justice System namely describing perpetrators eyewitness identification and jury decision making The purpose of this book was to consolidate the literature that exists regarding familiarity and to apply this research to an eyewitness context This book attempts to better

understand how familiarity may impact eyewitnesses and to highlight key considerations when an eyewitness is familiar with a perpetrator while collecting eyewitness evidence and using it in a courtroom This is achieved through an in depth discussion of the definition of familiarity the examination of critical social psychological and cognitive theory in relation to familiarity a description of the current literature examining eyewitness familiarity a discussion of familiarity evidence in the courtroom and a proposal for future directions and research *Psychology and Criminal Justice* János Boros,Iván Münnich,Márton Szegedi,1998 Papers presented at the 5th Conference of the European Association of Psychology and Law held in Budapest in 1995
