*Safe Havens for Hate* Tamar Mitts, 2025-03-04 Why efforts to moderate harmful content on social media fail to stop extremists Content moderation on social media has become one of the most daunting challenges of our time Nowhere is the need for action more urgent than in the fight against terrorism and extremism Yet despite mass content takedowns account suspensions and mounting pressure on technology companies to do more hate thrives online *Safe Havens for Hate* looks at how content moderation shapes the tactics of harmful content producers on a wide range of social media platforms Drawing on a wealth of original data on more than a hundred militant and hate organizations around the world Tamar Mitts shows how differing moderation standards across platforms create safe havens that allow these actors to organize launch campaigns and mobilize supporters She reveals how the structure of the information environment shapes the cross platform activity of extremist organizations and movements such as the Islamic State the Proud Boys the Oath Keepers and QAnon and highlights the need to consider the online ecosystem not just individual platforms when developing strategies to combat extremism Taking readers to the frontlines of the digital battleground where dangerous organizations operate *Safe Havens for Hate* sheds critical light on how governments and technology companies grapple with the tension between censorship and free speech when faced with violence hate and extremism

### **The Social Production of Knowledge in a Neoliberal Age**

Justin Cruickshank, Ross Abbinnett, 2022-04-04 Higher education exposes a key paradox of neoliberalism The project of neoliberalism was said to be that of rolling back the state to liberate individuals by replacing government bureaucracy with the free market Rather than have the market serve individuals however individuals were to serve the market The marketisation reforms in higher education which sought to reshape knowledge production with students investing in human capital and academics producing transferable research to make higher education of use to the economy has resulted in extensive government bureaucracy and oppressive managerialist bureaucracy which is inefficient and expensive Neoliberalism has always had authoritarian aspects and these are now coming to bear on universities The state does not want critical and informed graduate citizens but a hollowed out public sphere defined by consumption willing servitude to the market and deference to state power Attempts to reshape universities with bureaucracy are now accompanied by a culture war attacking the production of critical knowledge The authors in this book explore these issues and the possibilities for resistance and progressive change

### **Qanon** Marc-André Argentino, 2025-07-18

This book explores the QAnon movement by examining its history fluctuations and evolution stemming from the likelihood of multiple users behind the Q account as well as from the changes in the sociopolitical landscape since the creation of the movement It frames QAnon as a lived religion and demonstrates that it has gone through three stages of existence proto QAnon canonical QAnon and apocryphal QAnon Author Marc Andr Argentino argues that QAnon evolved into something more than a conspiracy theory and demonstrates through a comparative analysis that QAnon is more akin to a new religious

movement in particular a hyper real religion He explores the role of gender and women in the QAnon movement followed by an examination of how the QAnon conspiracy theories have legitimized and coordinated targeted gender based violence The book provides evidence of the nexus of QAnon and ideologically motivated violent extremism and criminality Finally it examines the evolution of QAnon after the January 6th insurrection the loss of the 2020 election by Donald Trump and the disappearance of Q This volume will be of great interest to researchers of conspiracy theories new religious movements American politics and extremism
