The Oxford Guide to the Romance Languages Adam Ledgeway, Martin Maiden, 2016 The Oxford Guide to the Romance Languages is the most exhaustive treatment of the Romance languages available today. Leading international scholars adopt a variety of theoretical frameworks and approaches to offer a detailed structural examination of all the individual Romance varieties and Romance speaking areas including standard non standard dialectal and regional varieties of the Old and New Worlds. The book also offers a comprehensive comparative account of major topics, issues and case studies across different areas of the grammar of the Romance languages. The volume is organized into 10 thematic parts. Parts 1 and 2 deal with the making of the Romance languages and their typology and classification respectively. Part 3 is devoted to individual structural overviews of Romance languages, dialects and linguistic areas, while Part 4 provides comparative overviews of Romance phonology, morphology, syntax, semantics and pragmatics and sociolinguistics. Chapters in Parts 5-9 examine issues in Romance phonology, morphology, syntax, semantics and pragmatics and discourse respectively, while the final part contains case studies of topics in the nominal group, verbal group and the clause. The book will be an essential resource for both Romance specialists and everyone with an interest in Indo-European and comparative linguistics.

Existentials and Locatives in Romance Dialects of Italy Delia Bentley, Francesco Maria Ciconte, Silvio Cruschina, 2015 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. This book provides the first ever large scale comparative treatment of there sentences (there copula NP) in over 100 Italo-Romance and Sardinian dialects spoken in Italy. It comprises detailed discussions of focus structure, predication and argument realization, definiteness effects and the linking between semantics and syntax in there sentences, advancing novel proposals in each case. The authors test influential hypotheses on existential constructions against first hand dialect evidence; they argue that existential and locative there sentences differ in focus structure and semantics even though they display similar morphosyntactic features. The volume also provides the historical background of Romance there sentences, relying on the findings of the analysis of a substantial corpus of early Italo-Romance vernacular texts. Couched in the framework of Role and Reference Grammar, the discussion fully engages with the vast available literature on existentials and locatives, thus being of interest to linguists of any theoretical persuasion. Through the investigation of existentials and locatives, the volume addresses key issues in linguistic theory while offering an invaluable source of data for research on the Romance languages and a model in fieldwork based microvariational analysis.

Subject Clitics in the Northern Italian Dialects Cecilia Goria, 2012-11-02. INTRODUCTION This book provides an encompassing analysis of Subject Clitics (SCLs) by giving a detailed description of these elements in two varieties of Piedmontese: a Northern Italian Dialect (Astigiano) and Turinese spoken in the areas of Asti and Turin respectively. It accounts for the structural position and function of these elements inside the computational system and for their

morphological and distributional properties It also provides an empirical and theoretical comparison between Piedmontese SCLs and SCLs in other Northern Italian Dialects NIDs of SCLs types in the NIDs have been regarded as Since the 1980s the majority elements of agreement in that they contribute to the realisation of subject verb agreement by expressing features of the subject similar in a way to verbal inflection Nonetheless SCLs are not to be assimilated to verbal affixes as they exhibit different properties Most distinctively they can be separated from the verb by other clitic elements and in the case of the varieties considered here SCLs are optional in all contexts and may be omitted in coordination A more refined identification of SCLs separates SCLs which encode agreement features from those which do not and are related to pragmatic factors as originally observed by Beninca 1994 with respect to the clitic a in Paduano The different morphological and syntactic properties that characterise SCLs across the NIDs have justified numerous accounts which regard them as head of their own projection

A Comparative Grammar of Borgomanerese Christina Tortora,2014 This book treats the morphosyntax of Borgomanerese a Northern Italian dialect The rich description of the many unusual features of this dialect some of which have not been previously reported in the literature gives rise to a number novel theoretical analyses advancing our understanding of syntax and syntactic theory
