Pipe Stress Engineering Liang-Chuan Peng, Tsen-Loong Peng, 2009 An up to date and practical reference book on piping engineering and stress analysis this book emphasizes three main concepts using engineering common sense to foresee a potential piping stress problem performing the stress analysis to confirm the problem and lastly optimizing the design to solve the problem Systematically the book proceeds from basic piping flexibility analyses spring hanger selections and expansion joint applications to vibration stress evaluations and general dynamic analyses Emphasis is placed on the interface with connecting equipment such as vessels tanks heaters turbines pumps and compressors Chapters dealing with discontinuity stresses special thermal problems and cross country pipelines are also included [Introduction to Pipe Stress Analysis](#) Sam Kannappan, 1986-05 Introduction to Pipe Stress Analysis offers a practical approach to analytical piping design Many approaches to design are presented that are used in engineering consulting companies but are not available in books Engineering equations from many piping codes are used and discussed Covered are problems encountered in the determination of pipe wall thickness and span limitations the design of piping configurations and of supports and connections that may be subject to varying temperatures and loads and the making of connections to rotating and nonrotating machinery Contains worked examples and computer programs for piping analysis **Calculator Programs for Pipe Stress**

Engineering Kenneth Scott Morgan, 1986 A comprehensive collection of programs for solving a wide variety of stress problems using both the TI 59 and HP 41CV calculators Each program is prefaced with a description of the problem to be solved the nomenclature code restrictions and program limitations Solutions are explained analytically and then followed by the complete program listing documentation and checklists Topics include calculations for pipewall thickness pressure vessel analysis reinforcement pads allowable span vibration stress and two anchor piping systems **Modeling and Simulation**
