Theology and the Dialectics of History Robert M. Doran, S.J., 1990-06-01 In this challenging work Robert M Doran explores the basis of systematic theology in consciousness and goes on to consider the practical role of such theology in establishing and fostering communities with an authentic way of life. This way of life would counteract the distortions and deformations of humanity that are exemplified by both late capitalism and Marxism. Theology positions and interpretations today argues Doran must be stated in the categories of a theory of history. The first part of the book outlines the horizon required for such categories. The second, third, and fourth parts incrementally derive the categories expressing a theory of history in terms of the reciprocal relations among subjects, cultures, and social structures. The final part on hermeneutics presents an argument for the pertinence of what has preceded for interpreting the words and deeds of others. Doran draws extensively on the thought of Bernard Lonergan and the work develops Lonergan's methodological insights. It issues a call to personal genuineness and authenticity informed by religious, moral, intellectual, affective, and psychic conversions by interior differentiation of one's consciousness and by Christian faith on the parts of theologians who aspire to arrest effectively the course of cultural decline.

moments Focusing on life's biggest messiest moments Sonja Lyubomirsky provides readers with the clear-eyed vision they need to build the healthiest most satisfying life Lyubomirsky argues that we have been given false promises myths that assure us that lifelong happiness will be attained once we hit the culturally confirmed markers of adult success This black and white vision of happiness works to discourage us from recognizing the upside of any negative and limits our potential for personal growth A corrective course on happiness and a call to regard life's twists and turns with a more open mind The Myths of Happiness shares practical lessons that prove we are more adaptable than we think we are It empowers readers to look beyond their first response sharing scientific evidence that often it is our mindset not our circumstances that matters most

Knowledge Without Expertise Raphael Sassower, 1993-07-01 This book critically examines the reliance of society on experts specifically attacking the notion of the privilege of scientific expertise and defining the politics of this intellectual discourse The extensive case material illustrates the consequences of claims of expert knowledge Sassower questions the perception that scientific controversies are focused on epistemological concerns and demonstrates how the debates are often politically motivated He proposes pedagogical models that would enhance the critical tools of the public of citizens who must continuously scrutinize the positions of experts and their knowledge claims
