years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed Engine Airframe Integration ,1992 *Business Service Check List* ,1967
