In contrast to non-human animals, language enables humans to invent a plurality of possible worlds, reflect

upon signs be responsible for our actions gain conscious awareness of our inevitable mutual involvement in the network of life on this planet and be responsibly involved in the destiny of the planet The author looks at semiotics the study of signs symbols and communication as developing sequentially rather than successively more synchronically than diachronically She discusses the contemporary phenomenon that people in today's society have witnessed and participated in as part of the development of semiotics Although there is a long history preceding semiotics in a sense the field is as a phenomenon more of our time than of any time past Its leading figures whom Petrilli examines belong to the twentieth and twenty first century Semiotics is associated with a capacity for listening This capacity is also the condition for reconnecting to and recovering the ancient vocation of semiotics as that branch of medical science relating to the interpretation of signs or symptoms The pragmatic aspect of global semiotics studies the impact of language or signs on those who use them and looks for consequences in actual practice In this respect Petrilli theorizes that the task for semiotics in the era of globalization is nothing less than to take responsibility for life in its totality
