Problems of Human Reproduction Paul

Popenoe,1926 **How We Do It** Robert Martin,2013-06-11 Despite the widespread belief that natural is better when it comes to sex pregnancy and parenting most of us have no idea what natural really means the origins of our reproductive lives remain a mystery Why are a quarter of a billion sperm cells needed to fertilize one egg Are women really fertile for only a few days each month How long should babies be breast fed In How We Do It primatologist Robert Martin draws on forty years of research to locate the roots of everything from our sex cells to the way we care for newborns He examines the procreative history of humans as well as that of our primate kin to reveal what s really natural when it comes to making and raising babies and distinguish which behaviors we ought to continue and which we should not Although it s not realistic to raise our children like our ancestors did Martin s investigation reveals surprising consequences of and suggests ways to improve upon

the way we do things now For instance he explains why choosing a midwife rather than an obstetrician may have a greater impact than we think on our birthing experience examines the advantages of breast feeding for both mothers and babies and suggests why babies may be ready for toilet training far earlier than is commonly practiced How We Do It offers much needed context for our reproductive and child rearing practices and shows that once we understand our evolutionary past we can consider what worked what didn't and what it all means for the future of our species

Human Reproduction Joyce M. Dwyer,1976 *Human Reproduction and Developmental Biology* David J. Begley,J. A. Firth,J. R. S. Hoult,1980 The Basics of Reproduction Anne Wanjie,2013-07-15 This text offers readers a comprehensive study of animal and plant reproduction that is aligned with the Common Core curriculum standards for science Readers learn about sexual and asexual reproduction how the pollination process works vertebrate and invertebrate reproduction Darwin's theories on evolution and the life cycles of different species Further they are introduced to the mechanics of reproduction including the passage of genetic information from parent to offspring cell division and the structure of DNA Human reproduction is also covered with topics including the male and female reproductive systems conception pregnancy the stages of labor as well as human development from birth to death Finally a biography of geneticist Barbara McClintock is featured which adds a unifying theme to the overall study of reproduction and how traits are passed from one generation to the next The eye catching imagery and diagrams of this dynamic resource make the topic approachable yet authoritative

Dynamics of Human Reproduction James W. Wood,2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables

him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research Instead of offering a general overview the focus is to answer one question Why does fertility and the number of live births vary from couple to couple within any particular population and from population to population across the human species as a whole Topics covered include ovarian function conception and pregnancy intrauterine mortality reproductive maturation and senescence coital frequency and the waiting time to conception marriage patterns and the initiation of reproduction the fertility reducing effects of breastfeeding the impact of maternal nutrition on reproduction and reproductive seasonality This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work *Conception to Birth* Howard M. Lenhoff, 1989 **Human**

Reproduction; Biology and Social Change Harold D. Swanson, 1974 *Human Reproduction: Physiology*, 1976

Biology & Medical Dynamics of Human Reproduction Laurence A. Cole, 2014-07-10 This book covers human female biology how the menstrual cycle is controlled how steroidogenesis is controlled and how the follicle and the egg are formed This book covers male biology and how steroid hormones are made and how sperm are synthesised and matured Then this book covers sex biology such as how the brain deals with libido and sexual images and how the brain controls erection and ejaculation This book deals with how sperm are matured upon intercourse how fertilisation takes place and how the fertilised embryo is matured and implants in the uterus The subjects of sexuality and homosexuality chromosome disorders and hydatidiform moles are carefully discussed and considered *Dynamics of Human Reproduction* James W. Wood, a must have reference text for any researcher interested in the biocultural determinants of human fertility and is appropriate as a textbook at the graduate level I expect it to remain a standard in the literature of demographic anthropology and reproductive ecology for many years to come *American Journal of Physical Anthropology*
