# **CHAPTER 10**

## **MAKING CAPITAL INVESTMENT DECISIONS**

### **Answers to Concepts Review and Critical Thinking Questions**

1. In this context, an opportunity cost refers to the value of an asset or other input that will be used in a project. The relevant cost is what the asset or input is actually worth today, not, for example, what it cost to acquire.
2. For tax purposes, a firm would choose MACRS because it provides for larger depreciation deductions earlier. These larger deductions reduce taxes, but have no other cash consequences. Notice that the choice between MACRS and straight-line is purely a time value issue; the total depreciation is the same, only the timing differs.
6. Depreciation is a noncash expense, but it is tax-deductible on the income statement. Thus depreciation causes taxes paid, an actual cash outflow, to be reduced by an amount equal to the depreciation tax shield  $TD$ . A reduction in taxes that would otherwise be paid is the same thing as a cash inflow, so the effects of the depreciation tax shield must be added in to get the total incremental aftertax cash flows.
7. There are two particularly important considerations. The first is erosion. Will the essentialized book simply displace copies of the existing book that would have otherwise been sold? This is of special concern given the lower price. The second consideration is competition. Will other publishers step in and produce such a product? If so, then any erosion is much less relevant. A particular concern to book publishers (and producers of a variety of other product types) is that the publisher only makes money from the sale of new books. Thus, it is important to examine whether the new book would displace sales of used books (good from the publisher's perspective) or new books (not good). The concern arises any time there is an active market for used product.

### **Solutions to Questions and Problems**

1. The \$3.5 million acquisition cost of the land six years ago is a sunk cost. The \$3.9 million current aftertax value of the land is an opportunity cost if the land is used rather than sold off. The \$16.7 million cash outlay and \$850,000 grading expenses are the initial fixed asset investments needed to get the project going. Therefore, the proper Year 0 cash flow to use in evaluating this project is

$$\$3,900,000 + 16,700,000 + 850,000 = \$21,450,000$$

2. Sales due solely to the new product line are:

$$25,000(\$19,000) = \$475,000,000$$

Increased sales of the motor home line occur because of the new product line introduction; thus:

$$2,700(\$73,000) = \$197,100,000$$

the cash flow statement to assess the company's ability to generate cash and fund operations

3 What methods do you use to forecast financial performance

Answer Example I use a combination of forecasting methods including trend analysis regression analysis and financial modelling

Trend analysis helps identify historical patterns and extrapolate future trends

Regression analysis helps quantify relationships between variables like sales and economic factors

Financial modelling involves building detailed projections based on assumptions about revenue growth expenses and capital expenditures

4 How do you assess the valuation of a company

Answer Example I assess the valuation of a company using multiple methods including discounted cash flow DCF analysis comparable company analysis CCA and precedent transactions

DCF analysis estimates the present value of future cash flows to determine intrinsic value

CCA compares key financial metrics of the target company with similar publicly traded companies

Precedent transactions analyse recent mergers and acquisitions in the industry to derive valuation multiples

5 Can you describe a time when your analysis influenced a major business decision

Answer Example In my previous role I conducted a detailed analysis of potential investment opportunities in new markets

By analysing market trends competitive landscape and financial projections I presented a comprehensive report to senior management outlining the risks and potential returns

My analysis provided the data driven insights needed to make an informed decision to enter a new market which led to a 20% increase in market share within two years

6 How do you stay updated with financial trends and developments

Answer Example I stay updated with financial trends and developments by regularly reading financial publications such as the Wall Street Journal Bloomberg and financial blogs

I also attend industry conferences and webinars to learn about emerging trends and best practices

Networking with peers in the finance industry and participating in professional development courses help me stay abreast of the latest advancements in financial analysis

7 How do you handle tight deadlines when conducting financial analysis

Answer Example I prioritize tasks based on urgency and impact ensuring that critical deadlines are met without compromising accuracy

I break down complex analyses into manageable tasks and set milestones to track progress

Effective time management delegation when feasible and clear communication with stakeholders help me deliver high quality financial analysis within tight deadlines

8 What software and tools do you use for financial analysis

Answer Example I am proficient in using Excel for financial modelling data analysis and creating complex financial reports

I also use financial analysis software such as Tableau for data visualization and Power BI for interactive dashboards

Additionally I am experienced in using ERP systems like SAP and Oracle for financial data management and reporting

9 How do you communicate your financial analysis findings to non financial stakeholders

Answer Example I tailor my communication to the audience avoiding technical jargon and focusing on key insights and implications

I use visual aids such as charts graphs and concise summaries to present complex financial data in an easily understandable manner

I encourage questions and feedback to ensure clarity and alignment on the implications of my analysis for decision making

10 What do you consider the most challenging aspect of financial analysis and how do you overcome it

Answer

Example The most challenging aspect of financial analysis is dealing with ambiguity and incomplete information especially when making forecasts or assessing new ventures To overcome this challenge I gather as much relevant data as possible validate assumptions rigorously and consult with subject matter experts when needed I also continuously refine my analytical skills and stay adaptable to adjust forecasts as new information becomes available Preparing for financial analysis interviews involves understanding these types of questions and practicing how to articulate your experiences and skills effectively Each answer should highlight your analytical abilities attention to detail and ability to communicate complex financial concepts clearly
