Teaching Reading Comprehension to English Learners in

Secondary Schools: A Research-Based Approach Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23 Teaching reading comprehension to English learners ELs in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school.

Future-proofing STEAME education in South Africa Rajendran Govender, Josef de Beer, Rouaan Maarman, Rajendra Chetty, 2025-02-28 This book aims to contribute to the discourse of finding innovative solutions to the myriad of challenges facing science education in South Africa. The book positions itself in the multi-disciplinary focus on Science, Technology, Engineering, Arts, Mathematics, and Entrepreneurship (STEAME) education rather than the traditional narrow focus on Science, Technology, Engineering, and Mathematics (STEM). The chapters in the book explore the challenges and opportunities facing STEAME education in a complex 21st century and at the advent of a society with a strong artificial intelligence component in its DNA. The leitmotif of the book is how engaging pedagogies could be utilised in the classroom to enhance self-directed learning, a sine qua non to future-proof South Africa's science and technological advancement. This is a book written by scholars for scholars. Its target audience includes academics and researchers in the field of science education and scholars engaged with innovative teaching pedagogies, particularly approaches that would enhance the achievement of

learners in disadvantaged contexts The chapters in the book although eclectic in approach all contribute to the central theme of the book Most of the chapters lean on textual analyses literature reviews or concept papers which disclose new ideas before full validation *Resources in Education* ,1989 *ERIC Educational Documents Index* Educational Resources Information Center (U.S.),1966 A subject author institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of Resources in education earlier called Research in education

Educational Leadership in Becoming Nuraan Davids,Yusef Waghid,2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education *ERIC Educational Documents Index, 1966-69: Minor descriptors and author index* ,1970 *El-Hi Textbooks and Serials in Print* ,2006
