

Chapter 11: Understanding Population's Growth Growth Rates

Section 11.1

Population Growth

1. A population is a group of organisms within space that share a common ancestor and are interbreeding.
2. A population is genetically homogeneous because all individuals have the same genetic information.

Population of Populations

1. Population is the number of individuals of the same species in that space at a given point in time.
2. Population is the group of individuals of organisms in a population.
3. A population's genetic composition may be stable, changing, or extinct.
4. Genetic drift occurs in populations that are small or isolated and genetic drift occurs more often.

Section 11.2: Population Growth

1. Population growth is the change in the number of individuals in a population.
2. Population growth is the change in the number of individuals in a population.
3. The growth rate of a population is the change in the number of individuals in a population.

Population Growth Rate

1. Population is the change in the number of individuals in a population over a given period of time.
2. Growth rate is the change in the number of individuals in a population over a given period of time.
3. Over time, the growth rate of a population changes because birth rates and death rates change.
4. The growth rate of a population is the change in the number of individuals in a population over a given period of time.

Population Growth

1. A population is a group of organisms within space that share a common ancestor and are interbreeding.
