CURRENT Aeronautical Charts FAR AIM PTS or Chart Supplements formally A FD There is nothing worse than on the night before the checkride thinking I don t have a chart I don t have an E6B I don t have this I don t have that It is the most horrible feeling in the world for you and a horrible feeling for your instructor because you both look unprepared showing up at the checkride trying to sneak through saying Well I couldn t get this in time or I forgot that It just doesn t look good If it is required you will not be able to take the test You want to show up at the checkride prepared I just picked three weeks as a general rule I used to say one or two weeks but I love the number three You should have everything that you need for the day of the checkride three weeks in advance You should have all the tools and things that we talk about three weeks in advance of that checkride Everything you need is listed in the PTS page 1 xi under Applicant s Practical Test Checklist We will provide a copy of the checklist in the Appendix Much of these items are now available digitally and can be updated within a few minutes The FAA has now approved the use of these digital products for checkrides but I would check with your DPE as to what he expects There are a few old hats out there that might still want you to demonstrate on paper as a backup A note on the use of digital products Tablets have an uncanny knack for over heating or running out of battery right at the most inopportune time Have a plan ready should this happen I had a student who was using his iPad for his instrument check Halfway through the first approach it over heated He had to land and print out the subsequent approach plates Lucky for him his examiner was being generous That might not always be the case
