our clients Therefore my purpose is to not only give you the information you need to find an honest competent computer consultant but in doing so to raise the standards and quality of services for all consultants in my industry I certainly want your feedback on the ideas in this book If you choose a Cloud Integrator as I ve outlined and they work please send me your story If you ve had a bad experience I want to hear those horror stories as well If you have additional tips and insights that we haven t considered please share them with me I might even use them in a future book Again the more aware you are of what it takes to find and hire great consultants in every aspect of your business not just technology the stronger your business will become I am truly passionate about building an organization that delivers uncommon service to my clients I want to help business owners see the true competitive advantages technology can deliver to your business and not just view it as an expensive necessity and source of problems **Cloud Computing** United States.
