**Data Mining: Foundations and Practice** Tsau Young Lin, Ying Xie, Anita Wasilewska, Churn-Jung Liao, 2008-08-20 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners

To express the visions forged in the workshop to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes studies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book

**Advances in Machine Learning II** Jacek Koronacki, Zbigniew W. Ras, Slawomir T. Wierzchon, 2009-12-24 This is the second volume of a large two volume editorial project we wish to dedicate to the memory of the late Professor Ryszard S Michalski who passed away in 2007 He was one of the fathers of machine learning an exciting and relevant both from the practical and theoretical points of view area in modern computer science and information technology His research career started in the mid 1960s in Poland in the Institute of Automation Polish Academy of Sciences in Warsaw Poland He left for the USA in 1970 and since then had worked there at various universities notably at the University of Illinois at Urbana Champaign and finally until his untimely death at George Mason University We the editors had been lucky to be able to meet and collaborate with Ryszard for years indeed some of us knew him when he was still in Poland After he started working in the USA he was a frequent visitor to Poland taking part at many conferences until his death We had also witnessed with a great personal pleasure honors and awards he had received over the years notably when some years ago he was elected Foreign Member of the Polish Academy of Sciences among some top scientists and scholars from all over the world including Nobel prize winners Professor Michalski's research results influenced very strongly the development of machine learning data mining and related areas Also he inspired many established and younger scholars and scientists all over the world We feel very happy that so many top scientists from all over the world agreed to pay the last tribute to Professor Michalski by writing papers in their areas of research These papers will constitute the most appropriate tribute to Professor Michalski a devoted scholar and researcher Moreover we believe that they will inspire many newcomers and younger researchers in the area of broadly perceived machine learning data analysis and data mining The papers included in the two volumes Machine Learning I and Machine Learning II cover diverse topics and various aspects of

the fields involved For convenience of the potential readers we will now briefly summarize the contents of the particular chapters

**Semantic Web Rules** Mike Dean,John Hall,Antonino Rotolo,Said Tabet,2010-10-06 This book constitutes the refereed proceedings of the International RuleML Symposium on Rule Interchange and Applications RuleML 2010 held in Washington DC USA in October 2010 collocated with the 13th International Business Rules Forum Conference 2010 The 14 revised full papers and 7 revised short papers presented together with the abstracts of 3 keynote lectures were carefully reviewed and selected from 42 submissions The accepted papers address a wide range of rule topics including traditional topics such as rules and uncertainty rule based event processing and reaction rules rules and inferencing rule transformation and extraction rules semantic technology and cross industry standards rules and norms rule based distributed multi agent systems and miscellaneous rule topics

**Foundations of Data Mining and Knowledge Discovery** Tsau Young Lin, Setsuo Ohsuga, Churn-Jung Liau, Xiaohua Hu, Shusaku Tsumoto, 2005-09-02 Foundations of Data Mining and Knowledge Discovery contains the latest results and new directions in data mining research

Data mining which integrates various technologies including computational intelligence database and knowledge management machine learning soft computing and statistics is one of the fastest growing fields in computer science Although many data mining techniques have been developed further development of the field requires a close examination of its foundations This volume presents the results of investigations into the foundations of the discipline and represents the state of the art for much of the current research This book will prove extremely valuable and fruitful for data mining researchers no matter whether they would like to uncover the fundamental principles behind data mining or apply the theories to practical applications *Navigating the Labyrinth* Laura Sebastian-Coleman, An Executive Guide to Data Management

**Foundations and Advances in Data Mining** Wesley Chu, Tsau Young Lin, 2005-09-15 With the growing use of information technology and the recent advances in web systems the amount of data available to users has increased exponentially Thus there is a critical need to understand the content of the data As a result data mining has become a popular research topic in recent years for the treatment of the data rich and information poor syndrome In this carefully edited volume a theoretical foundation as well as important new directions for data mining research are presented It brings together a set of well respected data mining theoreticians and researchers with practical data mining experiences The presented theories will give data mining practitioners a scientific perspective in data mining and thus provide more insight into their problems and the provided new data mining topics can be expected to stimulate further research in these important directions **Ency of Library and Inform Sci 2e V4 (Print)** Miriam A.
