Intraoperative

Neuromonitoring Josef Zentner, David B. MacDonald, Celine Wegner, 2024-05-22 Intraoperative neurophysiological monitoring IONM has gained increasing interest during the past decades and is now an integral part of various surgical disciplines especially in neurosurgery but also in otolaryngology orthopedics vascular surgery and general surgery With expanding applications and evolving techniques the monitoring team is faced with increasingly complex tasks and responsibilities Despite its importance and significance in modern surgical medicine and the expectations associated with it IONM is still not a regular part of the training program of medical professionals Although knowledge on monitoring is imparted in basic courses offered by a few professional societies systematic training of medical and non medical staff according to a standardized curriculum is still lacking This book aims to contribute to closing this gap It provides a practical guide to help medical nursing and technical personnel get familiar with intraoperative neuromonitoring The basic tenor is to combine theoretical and practical knowledge and thus to systematically convey essential skills about fundamentals possibilities but also limitations of IONM to a broad circle of readers In order to achieve this goal the text has been reduced to the absolutely necessary length in favor of numerous illustrations and tables After an introduction to the tasks the significance and the historical development of IONM the anatomical physiological and physical basics are presented This is followed by a presentation of various modalities as well as stimulation and recording techniques The intraoperative part begins with some information on the organizational processes in the operating room the presentation of safety aspects and a description of the influences of anesthesia on monitoring including the special aspects of awake surgery This is followed by some basic remarks on the interpretation of monitoring results and a rough overview of the application fields of IONM in various disciplines including representative case examples The manual concludes with an evaluation of the efficiency of monitoring and practical recommendations for the detection and elimination of intraoperative sources of error Self tests in individual chapters are intended to give readers the opportunity to determine their level of knowledge
