

Microfinance Sector and Sme Financial Suport in Albania

Alma Delija

Agricultural University of Tirana, Albania

Abstract

The creation of the microfinance sector and its functioning in Albania has played an essential role and has been and is a powerful tool for the development of small and medium enterprises (SMEs) of Albanian agribusiness. Microfinance has played an ever more decisive role in increasing output, reducing unemployment, improving the level of living conditions and welfare of the population, especially in rural areas, creating new jobs, contributing significantly to economic development Of the country. The growth and development of SMEs plays a fundamental role in the national economy, serving as a driving force in the country's economic development. Empirical evidence suggests that the growing SME sector and the dynamism of their development can strongly contribute to achieving a broad range of development objectives, such as: Achieving income distribution and poverty reduction; Creating employment; Savings mobilization; And production of goods and services that meet basic basic needs of the individual and society. Despite the great contribution to the growth and economic development of the country, the growth and development of SMEs in our country has been hampered by financial access, poor management skills, and lack of training opportunities and high input costs. Liquidities' sluggishness and low access to finance for SMEs is the biggest obstacle to them. SMEs have limited access to financial services provided by formal financial institutions to meet their liquidity and investment needs.

Introduction

Contingency test, and statistical analysis of the SME questionnaire

Analysis of questionnaire data

The data used are based on the questionnaire built to assess the performance of MFIs and the impact of lending on SME development. The total sample of the survey consists of 310 observations after database cleansing. SME employees are asked about their demographic characteristics (age, gender, educational level, place of residence etc.), the main characteristics of business where they work as operating activity, organization form, funding sources, savings and institutions where i Deposit savings as well as lending alternatives. Further, the study is based on the impact of collateral on borrowing, interest rate on loans and products, services offered by MFIs in micro-enterprise development. Respondents were asked about the factors that influence the choice of the MFI as a lending option, the level of satisfaction on products, the services they offer. Information on knowledge of products, procedures for applying and receiving credit from MFIs was collected. Finally, the focus of this descriptive analysis is the impact that has brought the cooperation with the microfinance institutions, the most valued aspect in terms of cooperation, the contribution of loans received from MFIs, as well as the performance evaluation of microfinance institutions by SMEs.

Contingency Analysis, Contingency Tables and Test χ^2

This is one of the most commonly used analyzes, which consists in the use of techniques that examine the relationship between variables through contingency tables. This analysis is performed for categorical data for more than one variable
