

Mixture Problem – Remove from Solution

John has 20 ounces of a 20% of salt solution.

How much water should be evaporated to make it a 30% solution?

20% of salt solution = 80% of water.

30% of salt solution = 70% of water.

Let y be the amount of water evaporated.

	Original	Removed	Result
Water	80% = 0.8	100% = 1	70% = 0.70
Amount	20	y	$20 - y$
Multiply	0.8×20	$1 \times y$	$0.70(20 - y)$

Original - Removed = Result

$$(0.8 \times 20) - (1 \times y) = 0.70(20 - y)$$

$$16 - y = 14 - 0.7y$$

$$y - 0.7y = 16 - 14$$

$$0.3y = 2$$

$$y = \frac{2}{0.3} \approx 6.67$$

Answer: 6.67 ounces of water should be evaporated.

Pharmaceutical Calculations Michalakis Savva, 2019-10-17 *Pharmaceutical Calculations A Conceptual Approach* is a book that combines conceptual and procedural understanding for students and will guide you to master prerequisite skills to carry out accurate compounding and dosage regimen calculations. It is a book that makes the connection between basic sciences and pharmacy. It describes the most important concepts in pharmaceutical sciences thoroughly, accurately, and consistently through various commentaries and activities to make you a scientific thinker and to help you succeed in college and licensure exams. Calculation of the error associated with a dose measurement can only be carried out after understanding the concept of accuracy versus precision in a measurement. Similarly, full appreciation of drug absorption and distribution to tissues can only come about after understanding the process of transmembrane passive diffusion. Early understanding of these concepts will allow reinforcement and deeper comprehension of other related concepts taught in other courses. More weight is placed on the qualitative understanding of fundamental concepts like tonicity vs osmotic pressure, diffusion vs osmosis, crystalloids vs colloids, osmotic diuretics vs plasma expanders, rate of change vs rate constants, drug accumulation vs drug fluctuation, loading dose vs maintenance dose, body surface area (BSA) vs body weight (BW) as methods to adjust dosages, and much more before considering other quantitative problems. In one more significant innovation, the origin and physical significance of all final forms of critical equations is always described in detail, thus allowing recognition of the real application and limitations of an equation. Specific strategies are explained step by step in more than 100 practice examples taken from the fields of compounding, pharmacy, pharmaceuticals, pharmacokinetics, pharmacology, and medicine.

Acing the New SAT I Math, 2004-09 *Acing the New SAT I Math* is a test prep guide for the math sections of the new SAT I. The book takes a learning fundamentals approach that sets it apart from other SAT materials. Written by a test prep teacher of ten years, Acing focuses on solid teaching and practice to help students master all the skills they need for the SAT I math. The book covers all the math topics found on the new SAT I, organized by subject into twenty chapters. Each chapter contains a tutorial, exercise set, and solutions. Three full-length practice tests are provided at the end of the book. Because Acing's emphasis is learning and mastering math concepts, the book includes 500 practice problems, not including example problems or practice tests more than are found in other test prep books. It also includes the most detailed solutions guides on the market, taking students step by step through each problem to help them identify their mistakes and hone their skills. Acing also seeks to eliminate the wordiness found in most other test prep books, employing a 2-column format in the tutorials. Key terms and illustrations in the left-hand column present the math concepts as clearly and concisely as possible. Example problems in the right-hand column enable students to simultaneously learn the application of these concepts. In all areas, Acing is designed with an emphasis on clear and direct teaching and with the belief that practice is the best preparation for any exam, including a standardized test like the SAT. Skipping the tricks and gimmicks, Acing stands apart from all the other test prep guides on the market. The book

is also written to be a stand alone resource so students can prepare for the SAT and PSAT on their own independent of outside instruction
