**Biological Insulating Liquids** Ernst Peter Pagger, Norasage Pattanadech, Frank Uhlig, Michael Muhr, 2023-03-01 This book describes the state of the art use of biological insulating liquids in detail In recent years more and more transformers filled with esters have been put into operation This is because people recognize the benefits of ester liquids in terms of their fire safety high flash and fire points and environmental characteristics judging from their biodegradability their low CO<sub>2</sub> footprint only valid for natural ester and their beneficial interactions with solid insulation etc One of the main reasons is that the water adsorption and absorption characteristics of these liquids are excellent and very different compared to mineral oil The today's discussion about climate change and global warming is an additional driver for using natural ester Another advantage is that transformers filled with biological insulating liquids can operate with an overload of up to 150% This is advantageous in the case of volatile energy generation from wind and solar power and in the supply of electrical energy for electromobility Liquid inside electrical equipment is the lifeblood that serves both as a dielectric and a cooling medium Some properties of these liquids differ from mineral oil which had to be considered in the transformer design The dielectric liquid is always in direct contact with transformer materials therefore the interaction should be very well understood especially when refilling an existing mineral oil filled device There are several natural ester fluids derived from various seeds and fruits on the market and their properties may differ more or less In the book the most important properties of the different biological insulating fluids and mineral oil are compared Ester fluids have already found their way into various standards The condition of the device can be verified very well from the contents of the insulating liquids For analysis and testing the same equipment and devices that are commonly used for mineral oil are used for ester liquid The chemical and physical behaviors of ester fluids compared to mineral oil are different This must always be considered when interpreting test results stemming from ester fluids The book is a guideline for students original equipment manufacturers users laboratories and authorities in the use of biological insulating liquids

**Advanced Materials, ICAMMP 2011** Jing Long Bu, Zheng Yi Jiang, Si Hai Jiao, 2011-12-06 Selected peer reviewed papers from the Second International Conference on Advances in Materials and Manufacturing Processes ICAMMP 2011 December 16 18 2011 Guilin China [A Virtual Testing Approach for Honeycomb Sandwich Panel Joints in Aircraft Interior](#) Ralf Seemann, 2019-08-29 Virtual test methods can contribute to reducing the great effort for physical tests in the development of lightweight products The present work describes an approach for virtual testing of sandwich panel joints based on the Building Block Approach and the Finite Elements Method Building on a multitude of physical tests on sandwich materials and joints adequate sub models are developed validated and synthesized to top level models The developed approach is eventually applied for the development of a novel sandwich panel joint
