

One of nature's most spectacular shows is the aurora borealis. Its lights dance against the dark night sky with rainbows of greens, reds, and yellows pivoting and shifting high above the earth.

The aurora borealis, also known as the northern lights, is a light show that occurs in the northern hemisphere's Arctic region. The further north you go toward the Earth's North Pole, the more likely you are to see the northern lights.

The northern lights work similar to the neon business signs we see in store windows. There is neon gas inside the tubes of the sign. The atoms of the neon gas are excited with electricity. The colors come from this reaction to electricity. The northern lights work in a similar manner, just on a bigger scale.

The northern lights occur because electrically charged particles collide with the Earth's gas atmosphere. On the surface of the Sun, large storms occur and particles are shed. Blown away from the Sun by the solar wind, these particles travel over 90 million miles before they reach Earth. Throughout history, the colors of the lights were a mystery. Stories from the past told tales of spirits and fires in the sky. Scientists, however, tell us that the color of the lights depends on the types of particles that are crashing together and how high the particles are in the atmosphere. The most common color is yellow/green colored lights. This is a result of oxygen high in the Earth's atmosphere and particles from the Sun colliding. When these particles from the Sun collide with nitrogen, the reaction gives off blue or red colors. Sometimes you might see a little pink color, and during strong solar storms you might see red, purple, or white.

People travel from all over the world to see the light show, and the best place to view this wonder of nature in the northern hemisphere is far north. Generally the high northern latitudes and places that border the Arctic Ocean like Alaska, Western Canada, Scandinavia, Russia, Greenland and Iceland are good places to see the lights. In order to see the northern lights you need a clear, dark sky; the farther away from any light sources, the better the viewing of the lights will be. Full moons can inhibit the viewing of the northern lights so a dark moon or no moon is best. Sometime during the winter months is usually a good time to view the lights because the Sun is up too long in the summer to provide good viewing. Forecasters can sometimes predict when the northern lights will be active and visible by monitoring the activity of the Sun.

The light activity peaks every 11 years. It is believed these peaks correspond to high solar activity. The northern lights viewed on August 28 and September 2, 1859, were thought to be the most spectacular in relatively recent history. The lights could be seen throughout the United States, Europe and Japan. This was a rare occurrence and most viewings are limited to places very close to the Arctic Circle.

Northern Lights Chapter 18:

The Ninja of the Northern Lights Kids' Stories Book Ayokunle Mathew Akinbi,2025-10-16 Have you ever seen the sky dance with color For young Kael the Northern Lights are more than just a beautiful sight they are the very heartbeat of his frozen world But when the vibrant ribbons of green and gold begin to flicker and fade replaced by a creeping unnatural cold Kael knows a terrible secret is unfolding An ancient evil Nocturne the Shadow Weaver is stealing the light threatening to plunge the land into an eternal starless night The fate of the North rests on the shoulders of one young boy who must journey into the heart of the storm He won t be alone An unlikely alliance forms with Boreas the wise polar bear guardian of the glaciers Lyra a swift warrior of the mountains and Faelan a mischievous arctic fox spirit guide Together they must face monstrous shadow hounds solve the riddles of ancient creatures and find the legendary Sword Forged in Starlight It is a quest of courage friendship and magic Will Kael find the inner strength to master the ways of the ninja and bring a new dawn to his world or will the shadows reign forever

Eighteen Wheels North to Alaska Cliff Bishop,2009-10-01 In spite of the obstacles the Alaska truckers were presented with they never weakened in their determination to get the job done These pioneer drivers never conquered or tamed Alaska s roads and weather but they learned to operate on the back trails and paths always making their way to the trip s end In spite of all the challenges they never quit The following from Teddy Roosevelt is an appropriate salute to Alaskan truckers It is not the critic who counts not the man who points out how the strong man stumbles or where the doer of deeds could have done better The credit belongs to the man who is actually in the arena whose face is marred by dust and sweat and blood who strives valiantly who errs and comes up short again and again because there is no effort without error or shortcoming but who knows the great enthusiasms the great devotions who spends himself for a worthy cause who at the best knows in the end the triumph of high achievement and who at the worst if he fails at least he fails while daring greatly so that high place shall never be with those cold and timid souls who knew neither victory nor defeat

Eighteen Wheels North to Alaska A History of Trucking in Alaska is the story of Alaskan drivers who guided coaxed pushed pulled plowed and somehow made it to the end of the road and beyond over high mountain passes whiteout conditions seventy below zero temperature through mud muck and tundra terrain even onto the Arctic Ocean ice beyond the shore

Northern Lights T. Rico,2013-05-03 It was past midnight in Norway when Dante awoke to find his wife Hannah standing by the bedroom window She was mesmerized by the red glare and high winds pouring into the bedroom from the Northern Lights The freakish red tornado that touched down in the small town of Fredrikstad on this particular evening brought with it much more than just a delightful display from the Aurora Borealis Follow the story of Hannah and Dante as they become chosen by the forerunners to save as many people as they can from the horror that awaits them Mutations now walk the planet under the emerald colored sky as the battle between good and evil ensues who will prevail in this story of love and disaster

Editors comments The pleasure of this novel is that it is vividly imagined The reader

senses that the writer is really seeing the things he is describing That's no small feat He also has a good instinct for pacing and maintaining suspense This book was so good that I got to within 15 pages of the end of the book and decided I didn't want it to end so I started from the beginning and read it a second time just to prolong the ending
