### ■ Aim and purpose

The aim of this unit is to enable learners to develop the skills to troubleshoot and diagnose, identify, resolve and repair a range of hardware and software faults in computer systems. This unit will also ensure learners understand how organisational policies can affect troubleshooting activities.

### ■ Unit Introduction

The ability to troubleshoot and repair IT systems (systems of hardware and software faults) is a valuable skill in IT support. The continuous development of IT systems, requires technical support personnel to keep up to date with technical problems so they can identify faults, quality and repair, as needed. In this unit, learners will research the various sources of technical information, systems and queries which are of most value for offering fault repair.

Learners will apply theoretical and practical knowledge of diagnosing and troubleshooting computer hardware and software problems, making use of different tools and techniques. Faults will be categorised according to how they are resolved and complex (physical, hardware, software) and basic, as well as other (operating and networking) fault types.

Technical support personnel deal with system users and it is important that communication with these users is often set up to ensure an understanding of any fault effects may allow support down time. Good support involves using appropriate fault resolution methods in the future.

An important aim of this unit is understanding health and safety issues and good practice when working on IT systems. IT completion of this unit learners will be able to handle tools correctly follow health and safety protocol and maintain data security and integrity when resolving faults.

This unit is suited for those considering progress to IT systems support or networking or for those wanting to gain a better practical awareness of an IT support procedure and practice. It has links with the QCF IT National Support.

### ■ Learning outcomes

On completion of this unit a learner should:

1. Understand how organisational policies can affect IT troubleshooting and repair
2. Be able to use appropriate tools to troubleshoot IT problems
3. Be able to select and apply fault resolution to IT systems
