only or the best alternatives This book advances another and sharply different model the Impresario with a Scenario a teacher who serves as class mobilizer improviser and energizer staging dramatic often unexpected and self unfolding learning challenges and adventures with students In this book the author argues that to pose a single alternative to lecturing is profoundly limiting In fact he says there is no reason to have to choose between student centered and teacher centered pedagogies The best ways to teach and learn are both The same applies to the false choice between active students and active teachers there can be more than enough activity for everyone In particular the author argues that we need a model in which the teacher is notably pro active a kind of activity for which certain theatrical metaphors seem especially appropriate Picture a college teacher who regularly sets up classroom scenarios challenging problems unscripted dramas role plays simulations and the like such that the scenario itself frames and drives most of the action and learning that follows For teaching as staging the primary work of the teacher is staging such scenarios The basic goal is to put students into an urgently engaging and self unfolding scenario trusting them to carry it forward while being prepared to join in as needed This book offers a conceptual and practical framework for Teaching as Staging grounding the approach with illustrative and sometimes provocative narrative from the literature as well as the author s own practice Teaching as the Art of Staging offers a visionary challenge to the prevailing models of pedagogy The book presents a thoroughly practical model that opens up new possibilities for anyone interested in dramatic new directions in teaching and learning

Environmental Ethics Bob Jickling, Heila Lotz-Sisitka, Lausanne Olvitt, Rob O'Donoghue, Ingrid Schudel, Dylan McGarry, Blair Niblett, 2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn t afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices
