In Our Own Image Istvan Hargittai, Magdolna Hargittai, 2000-02-29

The title of our volume refers to what is well described by the following two quotations God created man in his own image and Man creates God in his own image

2 Our approach to symmetry is subjective and the term personal symmetry reflects this approach in our discussion of selected scientific events We have chosen six icons to symbolize six areas Kepler for modeling Fuller for new molecules Pauling for helical structures Kitaigorodskii for packing Bernal for quasicrystals and Curie for dissymmetry For the past three decades we have been involved in learning thinking speaking and writing about symmetry This involvement has augmented our principal activities in molecular structure research Our interest in symmetry had started with a simple fascination and has evolved into a highly charged personal topic for us At the start of this volume we had had several authored and edited symmetry related books behind us We owe a debt of gratitude to the numerous people whose interviews are quoted in this volume We very much appreciate the kind and gracious cooperation of Edgar J Applewhite
