We have no expectation that you are an expert at all – that's why you're coming on our course – but rather this is a familiarization exercise.

Assessing Language Teachers' Professional Skills and Knowledge Rosemary Wilson, Monica Poulter, 2015-01-31 The growth in English language teaching worldwide and the related increase in teacher training programmes of all kinds highlight the need for greater accountability in the assessment of teachers The need for formal summative assessment has taken on greater importance in training programmes and requires procedures which do not always sit easily with the development process while transparency of assessment procedures is also increasingly demanded by the candidates themselves This edited volume discusses key issues in assessing language teachers professional skills and knowledge and provides case study illustrations of how teacher knowledge and teaching skills are assessed at pre service and in service levels within the framework of the Cambridge English Teaching Qualifications The volume provides discussion of ways in which the changing nature of English language teaching has impacted on teacher education and assessment examples of specific assessment procedures for both teaching knowledge and practical classroom skills accounts of the ways in which the Cambridge English Teaching Qualifications have been integrated into and adapted for local contexts This is the first volume of its kind wholly dedicated to language teacher assessment and as such will be of interest to language teachers and teacher educators as well as to researchers and postgraduate students

TBLT as a Researched Pedagogy Virginia Samuda, Kris Van den Branden, Martin Bygate, 2018-10-15 Bringing together experienced classroom researchers and teacher educators from different countries where tasks are playing an influential role in language education this collected volume critically explores how TBLT research can engage with pedagogy and how TBLT pedagogy can engage with research A defining part of the TBLT project has always been a dual concern both with the nature and use of tasks in language teaching and with empirical research to guide and support classroom practitioners the two concerns suggesting a central and reciprocal relationship between research and pedagogy However this relationship has at times been unbalanced and its centrality has sometimes gone by default problems which this volume aims to address The introduction proposes criteria to improve the congruence between the research base of TBLT and the concerns and terms of reference of classroom practitioners Using a range of methodologies the individual chapters illustrate and explore different aspects of this theme The book will be of interest to all those wishing to further their understanding of and or investigate the use of TBLT in educational contexts
