Andrews, Patricia Shaw, John McPhee, 2018-01-18 Canadian Professional Engineering and Geoscience Practice and Ethics 6e is a unique and comprehensive text for today's Canadian students and practising professionals. Structured in five parts, the text is written in an approachable and engaging style that effectively covers practice and ethics topics while offering advice for readers to become effective professionals. The authors guide readers through professional licensing, practice ethics, and environmental practice and ethics using history, case studies, examples, and images to bring the issues to life. Canadian Professional Engineering and Geoscience is up to date with Engineers Canada's practice and ethics syllabus and is the recommended study guide for this section of the PPE. The coverage in this sixth edition includes all provinces and territories of Canada and contains updated, new, and revised content and cases, including the fascinating new case history, Accidental Overdose: The Therac-25 Radiation Therapy Accidents. This edition has expanded its Employment Management and Consulting sections with new and relevant Canadian cases to keep readers engaged and connected to the content. Canadian Professional Engineering Practice and Ethics G. C. (Gordon Clifford) Andrews, Kemper, John Dustin, 1999
Engineering Unesco, 2010-01-01 This report reviews engineering's importance to human economic, social, and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences, and journals all demonstrate that it is as international as science. The report reviews the role of engineering in development and covers issues including poverty reduction, sustainable development, climate change mitigation, and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.
