Carnarvon Basin Geoscience Australia:

Atlas of Australian and New Zealand Hydrocarbon Seals Richard Daniel, John Kaldi, 2012-08-20 **Year Book Australia**, **Resolving the Late Paleozoic Ice Age in Time and Space** Christopher R. Fielding, Tracy D. Frank, John L. Isbell, 2008-01-01 This volume summarizes new developments in understanding the longest lived icehouse period in Phanerozoic Earth history the late Paleozoic ice age Resolving the Late Paleozoic Ice Age in Time and Space provides summaries of existing and new data from the various Gondwanan continental relics and also reviews stratigraphic successions from the paleotropical and temperate regions of Laurussia that preserve an indirect record of glaciation It addresses the extent to which records of glaciation indicate protracted long term climatic austerity as opposed to fluctuating more dynamic climate and provides new constraints on the timing of glaciation Additionally it tackles questions of synchronicity of glaciation across the various Gondwanan continental relics and timing relationships between near field and far field records at greater levels of resolution than has been possible previously Results point toward a dynamic icehouse regime that is comparable to the Cenozoic icehouse and away from traditional interpretations of the late Paleozoic ice age as a single protracted event that involved stable long lived ice centers Publisher s website *The Impacts of Igneous Systems on Sedimentary Basins and their Energy Resource* B. Kilhams, S. Holford, D. Gardiner, S. Gozzard, L. Layfield, C. McLean, S. Thackrey, D. Watson, 2024-08-13 Many sedimentary basins worldwide contain extrusive and intrusive igneous rock sequences and these rocks and associated magmatic processes can exert profound influences on a diverse range of basin processes and elements including multiscale structural and tectonic development heat flow transport of hydrocarbons and other basinal fluids and the hydraulic properties and integrity of reservoir and sealing units Recent years have witnessed increased focus on improved understanding of igneous processes in basins to aid hydrocarbon exploration and development projects and there is growing interest in the multifaceted role that igneous sequences in basins may play in the energy transition for example as components of carbon capture and storage projects and sources of geothermal energy natural hydrogen and helium This volume showcases state of the art research from both academia and industry drawing on global examples and addressing reservoir to plate scales providing critical new data knowledge and technological capabilities that highlight the opportunities complexities and potential pitfalls associated with unlocking the energy resources of sedimentary basins impacted by igneous processes [Securing Australia's Future](#) Simon Torok, Paul Holper, 2017-05-29 The future will bring change for Australia But whether that change is for the better or worse largely depends on the decisions we make today as individuals and as a nation Recognising rapid changes in the global economy environment and policy the Australian Government engaged the Australian Council of Learned Academies ACOLA to undertake detailed interdisciplinary research to help guide Australian thinking and policy decisions Dozens of Australia s finest minds assessed the opportunities available to the nation globally and domestically charting a course for the future The resulting findings can prepare Australia to

The Indian Mesozoic Chronicle Jai Krishna,2017-03-11 The book reviews and summarizes the Indian Mesozoic geological evolution in an innovative alternative perspective of sequence stratigraphy It mainly focuses on the Jurassic interval but also concisely discusses the preceding Triassic and Cretaceous geological records The key to the study is primarily held in the recently developed ammonoid based high resolution scales in the Triassic and Jurassic period The Indian Jurassic record is thus elevated to a high resolution pedestal The large intra Jurassic stratigraphic gap in Kachchh with increase in duration from margin to basin has been pr cised in different sections along with radical revision of its long held interpretation from sub aerial to sub marine all over from Arabia to Australia Other significant gaps are also differentiated into sub aerial and sub marine The Indian Late Precambrian Neogene record is organized into five mega sequences Among these the fourth also the most important one includes the intra Permian to Early Eocene interval from the origin to the closure of the Neotethys Based on multidisciplinary integration of the Indian Mesozoic geological record and comparison with hydrocarbon producing basins on east and west of India a highly positive scenario of the hydrocarbon source reservoir sediment perspective is outlined in the book in sequence stratigraphic backdrop as an edifice for future elaborate evaluation
